PACIFIC GAS AND ELECTRIC COMPANY
LOW INCOME ENERGY EFFICIENCY PROGRAM
AND CARE PROGRAM MONTHLY REPORT
FOR SEPTEMBER 2010

This Low Income Programs Monthly Report complies with low income reporting requirements established in Decision (D.) 01-05-033, as updated by D.08-11-031, requiring the utilities to comply with reporting and program evaluation requirements previously established for the California Alternate Rates for Energy (CARE) and Low Income Energy Efficiency (LIEE) programs. The utilities met with Energy Division staff to revise reporting tables and formats in compliance with the mandates of D.08-11-031 and now use the new, Energy Division-approved monthly reporting format for the 2010 reports.

1. LIEE Executive Summary

The LIEE program provides free home weatherization, energy efficient appliances and energy education services to income-qualified PG&E customers throughout the Company's service area.

PG&E has offered energy efficiency programs to income-qualified customers in its 48 counties since 1983. The Low Income Energy Efficiency (LIEE) program's objective is to help income-qualified customers reduce their energy consumption and costs while also improving their quality of life. The 2009-2011 LIEE program authorized in D.08-11-031 is a resource program emphasizing long-term and enduring energy savings, which continues to serve all eligible low income customer populations by providing all feasible LIEE measures at no cost to the customer through a direct-install, whole house approach. All housing types are eligible to participate and the LIEE program is available to both homeowners and renters.

**1.1. Low Income Energy Efficiency Program
Overview**

The 2009-2011 LIEE program was adopted in D.08-11-031. PG&E's authorized LIEE program budget for 2009-2011 is \$416.9 million, plus any remaining unspent carryover.

PG&E's 2009-2011 LIEE program follows the policies and guidance given in D.07-12-051. D.07-12-051 established the following programmatic initiative for LIEE:

To provide all eligible customers the opportunity to participate in the LIEE programs and to offer those who wish to participate all cost-effective energy efficiency measures in their residences by 2020.

PG&E's LIEE program has treated 94,207 customers in 2010.

1.1.1. Provide a summary of the LIEE Program elements as approved in Decision 08-11-031:

LIEE Program Summary for Month			
2010	Authorized / Planning Assumptions	Year-to-Date Actual	%
Budget	\$ 167,847,834	\$ 102,253,930	61%
Homes Treated	124,991	94,207	75%
kWh Saved	42,600,000	36,072,677	85%
kW Demand Reduced	7,560	8,986	119%
Therms Saved	1,510,000	1,951,635	129%

1.2. Whole Neighborhood Approach Evaluation

In D.08-11-031, the Commission described a Whole Neighborhood Approach to LIEE installation, under which the IOUs install all feasible measures in the homes of eligible customers on a neighborhood-by-neighborhood basis. The Commission believes this approach will increase energy savings, reduce overhead and transportation costs, and encourage leveraging with local entities.

1.2.1. Provide a summary of the geographic and customer segmentation strategy employed, (i.e. tools and analysis used to segment “neighborhoods,” how neighborhoods are segmented and how this information is communicated to the contractor/CBO).

PG&E identifies neighborhoods with large numbers of low income customers with the aid of census and other demographic information and correlates it with PG&E customer energy usage information, as directed in D.08-11-031. Key variables defined by the Commission in D.08-11-031 were high incidences of poverty and high energy use, as well as high energy burden and energy insecurity.¹

To identify potential neighborhoods to target for the LIEE programs, PG&E starts with its estimates of LIEE eligibility by ZIP-7, derived from census data.² PG&E

¹ Energy burden is the percent of income that goes towards payment of energy bills, and energy insecurity refers to customers experiencing difficulty in paying energy bills and actual or threatened utility shut-offs.

² The joint utility methodology, which derives the number of customers potentially eligible for CARE and LIEE services in each utility’s service area, was adopted by the Commission in D.01-03-028, and is updated annually. Sources for this estimation include: the Commission’s current guidelines; current year small area vendor marginal distributions on household characteristics; Census Public Use Microdata Sample (PUMS) 2000 and PUMS 2007 sample data; utility meter and master meter household counts; Department of Finance CPI series; and various Geographic Information System (GIS) sources. ZIP-7s are smaller breakdowns of postal ZIP Codes that are used

Footnote continued on next page

has ranked ZIP-7 areas with the highest populations of estimated LIEE-eligible customers³ in its service area, and correlates them with PG&E billing information, including information on PG&E customer energy use;⁴ the number of 48-hour shut-off notices sent; actual shut-offs over the last year; and the number of customers in PG&E's Third-Party Notification Program. PG&E also correlates this data with the current CARE penetration rate, and the number of customers who have already participated in LIEE since 2002 (thus making them ineligible for participation at this time).

Finally, D.08-11-031 permits targeted self-certification and enrollment activities in areas of the IOUs' service territory where 80% of the customers are at or below 200% of the federal poverty line. (D.08-11-031, O.P.6) PG&E ranks ZIP-7 areas by percent of LIEE estimated eligibility. As described above, areas with the highest estimates of LIEE eligibility, correlated with high energy usage, the number of 48-hour shut-off notices sent, actual shut-offs over the last year, and low previous LIEE participation, are evaluated so that they can be selected first for the Whole Neighborhood Approach events. We anticipate that some of the areas selected will be over 80% LIEE-eligible. These neighborhoods where over 80% of the customers are at or below 200% of the federal poverty level will be self-certified.

Using this information to help determine potential neighborhoods to approach with the LIEE program, PG&E's LIEE program managers are working with both internal and external groups to target and select neighborhoods. PG&E works closely with its LIEE implementation contractors, CARE outreach contractors, PG&E local government relations and communications staff, and state LIHEAP agencies to help establish contact with government representatives and neighborhood leaders.

for small area research in census data. They are the smallest geographical area for which reliable income and demographic data is available.

³ Customers with household incomes at or below 200% of the Federal Poverty Level are eligible for both LIEE and CARE.

⁴ To calculate energy use, PG&E's electric customers were divided into low, medium and high tiers, based on their electric use at Tiers 1-2 (Low Electric Use below 130% of baseline), Tier 3 (Medium Electric Use from 131% to 200% of baseline) and Tiers 4-5 (High Electric Use above 200% of baseline). A customer is considered at the highest tier if they overused electricity during at least two months of the previous twelve month period. PG&E chose to use a two month tier trigger rather than a one month trigger to help filter out atypical usage patterns caused by unusual weather spikes, temporary home visitors, or other outlier events that are not indicators of normal household energy usage.

In order to accurately assess home energy use, a customer must have a minimum six month billing history to be eligible to participate in the program. Customers with less than a six month history will be re-evaluated after they have sufficient billing history.

PG&E also tiered gas usage and divided gas customers into Tier 1 below-baseline low usage customers, and Tier 2 above-baseline high usage customers. PG&E used the same two month trigger described above for electric tiering.

In addition to neighborhoods identified and selected by PG&E for Whole Neighborhood Approach events, PG&E's contractors are also encouraged to suggest neighborhoods to target based on their knowledge of the areas in which they work. PG&E contractors are very familiar with the local neighborhoods in their assigned areas and currently use many strategies to enroll LIEE customers, including canvassing neighborhoods; targeted direct mail; outbound calls; advertising in local venues; speaking to local groups; and outreaching at community events.

Where practical, PG&E coordinates LIEE neighborhood events with scheduled CARE events such as "We CARE" or other community activities, including fairs or festivals, and publicizes them in advance through targeted mailings, door hangers, local community partners (e.g., civic and social leaders, churches, and low income service agencies), and local print, radio and television media. PG&E's outreach staff work to publicize and promote events with local community and civic leaders, and to enlist their support and partnership in making neighborhood events a success. PG&E contractors all carry door hangers to leave behind at the homes of customers that were not home at the time of the neighborhood visit. The door hangers include program and contact information so that the customer can schedule a visit.

1.3. LIEE Customer Outreach and Enrollment Update

PG&E increases outreach within the Company by coordinating activities and advertising with other PG&E energy efficiency and rate programs likely to reach low income customers and service providers. PG&E's LIEE contractors are required to inform customers about other programs (such as CARE) for which they may be eligible. For LIEE customers not already enrolled in the CARE program, the customer data is shared with CARE and the customer is automatically enrolled in CARE. PG&E no longer requires that the customer sign a CARE application at the time of the LIEE enrollment.

PG&E combines its LIEE and CARE outreach activities in order to leverage low income outreach efforts and provide PG&E low income customers with the knowledge and tools to access all of PG&E's free energy services.

PG&E employees regularly make presentations about the Company's low income programs to the media and at community events throughout PG&E's service area. These presentations educate customers about energy efficiency and inform them about assistance programs and opportunities available to them through PG&E. PG&E employees make presentations and design media initiatives about LIEE and CARE in multiple languages, including English, Spanish, Chinese and Vietnamese.

PG&E contracts directly with both community-based organizations (CBOs) and private contractors who provide a wealth of experience in the communities they serve. PG&E currently has 33 installation contractors including 10 CBOs and two appliance contractors who serve 48 counties and over 70,000 square miles in

PG&E's service area. Of the 10 CBOs, six are Low Income Home Energy Assistance Program (LIHEAP) agencies.

PG&E has six contracts with LIHEAP agencies that are not working within PG&E's LIEE program. PG&E coordinates with these LIHEAP agencies to install Energy Star® refrigerators in homes receiving PG&E electric service where the LIHEAP contractors have installed all other measures under the State Weatherization Program. This allows both the LIEE and LIHEAP programs to leverage their resources and help additional low income homes. Through September, 184 refrigerators have been installed, which equates to \$147,200 leveraged through this program.

PG&E and its contractors use PG&E's Energy Partners Online database (EPO) for LIEE activities. The database shows which customers received LIEE services, what year they were provided, and which customers are participating in CARE. With this information, the contractors are better able to market to the community, e.g., contacting only those customers who have not received LIEE services in the past.

LIEE program materials are provided in seven languages: English, Spanish, Vietnamese, Chinese, Russian, Korean, and Hmong.

In addition, PG&E continues to combine its LIEE and CARE outreach activities in order to leverage low income outreach efforts and provide PG&E's low income customers with the knowledge and tools to access all of PG&E's free energy services.

1.3.1. Provide a summary of the LIEE Program outreach and enrollment strategies deployed this month.

PG&E's hard-to-reach customer outreach group manages outreach and messaging for PG&E programs targeting low income, multilingual and other hard-to-reach customer populations, including LIEE, CARE, Energy Efficiency, Government Partnerships, Third Party Programs, Solar, and Demand Response programs. It specifically targets seniors, disabled customers, families, ethnic populations, rural and urban customers, and other low income PG&E customers through a combination of PG&E bill inserts and direct mailings, outbound calling, public service announcements, ethnic and local media, community partnerships, grassroots marketing, social networking, and other innovative approaches.

PG&E marketing and outreach is also performed by the LIEE implementation subcontractors. These contractors are responsible for enrolling LIEE participants to meet their contract goals. PG&E provides them with a database containing current CARE customers in their contract area. In addition, the program database notes which customers have participated previously and are thus ineligible to receive LIEE services. This database is updated on a weekly basis.

PG&E contractors currently use many strategies to enroll LIEE customers, including canvassing neighborhoods, targeted direct mail, outbound calls, advertising in local venues, speaking to local groups, and outreach at community events. Customers who phone PG&E's customer service call centers are referred to the LIEE program and assigned to the contractor in their area who sets up an appointment with them. PG&E is helping its contractors continue these successful marketing and outreach strategies.

LIEE also takes full advantage of CARE's successful low income customer segmentation and targeted marketing strategies by working closely with its CARE outreach team. CARE outreach targets seniors, disabled customers, families, ethnic populations, rural and urban customers, and other low income PG&E customers.

In September, LIEE outreach was directed at the general public and the Whole Neighborhood Approach. This included the launch of an automated outbound phone call campaign targeting neighborhoods in which LIEE estimates there is a large program-eligible population, a bill insert to all PG&E customers, and work on a direct mail campaign.

Talks surrounding seven collaborative efforts and Whole Neighborhood Approach-based partnerships continued in September in cities in the Bay Area, Sacramento and down the Central Valley. Meetings and focus groups were also held related to the development of a single, statewide LIEE program name.

The outreach staff continues to attend community meetings and make presentations at various events and forums and to create marketing opportunities and further develop relationships that will help the program reach and enroll eligible customers.

During the month of September, LIEE participated in the following outreach events:

- 2010 Downtown San Rafael Market Festival on 09/02/10 and 09/16/10.
- Nummi Career Transition Center Presentation in San Jose on 09/02/10.
- 13th Annual Senior Resource Fair in San Leandro on 09/10/10.
- 5th Annual Asian Resource Fair in Fresno on 09/25/10.

1.4. Leveraging Success Evaluation, Including CSD

- 1.4.1.** Please provide a status of the leveraging effort with CSD.
What new steps or programs have been implemented?
What was the result in terms of new enrollments?

PG&E, SCE, SDG&E, and SoCalGas met with CSD staff, representatives from several LIHEAP agencies and CPUC staff in Downey on April 29, 2009 to discuss leveraging opportunities. Ideas discussed included: developing a shared repository database that could include customers served and customers on wait lists by utilities and LIHEAP agencies; and sharing utility information with LIHEAP agencies about LIEE customers who are found to be over the LIEE income guidelines or require HVAC or other services which the utilities are unable to provide under LIEE guidelines. PG&E has attempted to schedule follow-up meetings with CSD; however, CSD has been unable to attend. In the meantime, PG&E has also had conversations with individual LIHEAP agencies to come up with workable strategies and discuss how we can work together to implement them. One such series of meetings culminated in the successful Sacramento Avenues Weatherization Project with Community Resource Project and SMUD in April. Following the success of this effort, PG&E is working to expand this project to other locations and to implement more leveraging projects with individual LIHEAP agencies.

1.5. Workforce Education & Training

- 1.5.1.** Please summarize efforts to improve and expand LIEE workforce education and training. Describe steps taken to hire and train low income workers and how such efforts differ from prior program years.

All contractors and subcontractors responsible for implementing the LIEE program are trained at the PG&E Energy Training Center (ETC) in Stockton California. Most of these LIEE energy specialists and installation contractors are from the local communities in which they work. Because of the increased size of the 2010 LIEE program, more contractor crews have been hired to implement the LIEE program, and 727 individuals have been trained to deliver the LIEE program year-to-date.

PG&E selected and hired a consultant to conduct an on-line training pilot project through a Request for Proposal (RFP) process authorized by D.08-11-031. This pilot will explore what LIEE training currently conducted on-site at the ETC can be moved to a web-based and/or off-site curriculum without decreasing effectiveness or results. Specifically, the pilot will evaluate the effectiveness of selected topics for on-line training in lieu of sending all students to a single location for all elements of the certification program. The integration of an on-line training component may reduce the training costs of LIEE Weatherization Specialists by the participating LIEE contractor, which could lead to the training of more individuals.

PG&E is actively involved with the California Energy Efficiency Long Term Strategic Plan's Workforce Education and Training team that is developing plans to conduct green workforce needs assessment research. PG&E is also managing Energy Division's pilot project (authorized in D.08-11-031) to develop a low income workforce education and training plan. This pilot will recruit and train residents of disadvantaged, low income communities to install energy efficiency measures in households as part of the LIEE program. Specifically, this pilot will develop and implement an in-class and hands-on curriculum to be used as part of a certificated program to be administered through educational institutions. Energy Division selected a Northern and a Southern California team to implement two workforce education and training pilot projects. LIEE training approaches are currently being piloted at Los Angeles Trade Tech College (LATTTC) in Southern California Gas Company's service area and San Francisco Office of Economic and Workforce Development (OEWD) in PG&E's service area. PG&E is the contract administrator for both projects. Currently, SF OEWD has trained 14 students; seven of which were hired by LIEE contractors. LATTTC has trained 266 students; 46 of which were hired by LIEE contractors.

1.6. Miscellaneous

LIEE Coordination with the Single Family Affordable Solar Housing Program (SASH)

PG&E's Energy Partners program works with Grid Alternatives to deliver LIEE services to customers that have been approved to participate in the Single Family Affordable Solar Housing Program (SASH). Grid Alternatives refers SASH-eligible homes to PG&E on a regular basis. If the customer has not yet participated in LIEE, the customer is placed in the program. The home is assessed, and delivery of all eligible measures is expedited. PG&E then notifies Grid Alternatives of the measures that were installed in the home. Grid Alternatives uses this data in their calculations to accurately size the SASH solar unit to be installed. In 2010, LIEE has treated 34 homes that were selected for SASH program participation. In addition, PG&E supplied LIEE measure installation data for another 49 SASH-selected homes that were treated through the LIEE program in prior years.

2. CARE Executive Summary

The CARE program provides a monthly discount on energy bills for income-qualified households throughout PG&E's service area.

To qualify for CARE, a residential customer's household income must be at or below 200 percent of Federal Poverty Guidelines, as required in D.05-10-044.

2.1. CARE Program Summary

The 2009-2011 CARE Program was adopted in D.08-11-031. The authorized CARE administrative budget is \$9,216,000 for 2010. This includes \$400,000 for PG&E's Cooling Centers program.

2.1.1. Please provide CARE program summary costs

CARE Budget Categories	Authorized Budget	Actual Expenses Year to Date	% of Budget Spent
Outreach	5,700,000	3,636,566	64%
Automatic Enrollment	150,000	0	0%
Proc / Certification / Verification	1,900,000	1,123,394	59%
Information Tech / Programming	150,000	115,271	77%
Pilots	75,000	29,471	39%
Measurement and Evaluation	0	0	0%
Regulatory Compliance	110,000	80,703	73%
General Administration	525,000	211,908	40%
CPUC Energy Division Staff	206,000	92,769	45%
Cooling Centers	400,000	121,628	30%
Total Expenses	9,216,000	5,411,710	59%
Subsidies and Benefits	470,115,337	576,870,790	123%
Total Program Costs and Discounts	479,331,337	582,282,500	121%

2.1.2. Please provide the CARE program penetration rate to date

CARE Penetration		
Participants	Estimated Eligible Participants	YTD Penetration Rate
1,479,574	1,617,125	91%

2.2. Outreach

2.2.1. Discuss utility outreach activities and those undertaken by third parties on the utility's behalf.

PG&E's CARE program rolled out the following outreach direct mail initiatives to increase enrollment of eligible customers in September:

- E-mail Campaign – information about CARE, LIEE, Family Electric Rate Assistance (FERA), and Temporary Energy Assistance for Families (TEAF) programs was e-mailed to 43,000 income-qualified customers who are also signed up for the paperless bill.
- Customer Care and Billing Direct Mail – 200,000 direct mail pieces were mailed utilizing data from PG&E's customer information system. Year-to-date, this initiative generated 3,277 new enrollments.
- Recertification Direct Mail –direct mail pieces in English, Spanish, Chinese, and Vietnamese were mailed to customers who failed to recertify. This direct

mail reoccurs on the 15th of every month. Year-to-date, PG&E's CARE Program has re-enrolled 7,266 customers back to the program.

- College Initiative – over 4,400 applications were mailed to 11 community colleges starting in August. Year-to-date, this initiative generated 31 new enrollments.
- Welcome Packet Insert – applications were inserted monthly into new customers' welcome packets. Year-to-date, this initiative generated 936 new enrollments
- 15-Day Notice Insert – applications were inserted monthly into customers' 15-day notices. Year-to-date, this initiative generated 170 new enrollments.
- Employee Involvement – this initiative was started in June and will be ongoing for a year to educate employees and to encourage them to reach out to customers, friends and neighbors about the CARE program. Year-to-date, this initiative generated 55 new enrollments.

As part of its mass media campaign, PG&E promoted the CARE Program via ethnic television and radio media in September.

- The CARE commercial airs on KBCW44/Cable 12 and KPIX5/CBS5.
- The Cantonese advertisement ran on radio station KVTO in San Francisco, Alameda, San Mateo, Contra Costa, Marin, Napa, Solano and Sonoma Counties.
- The Vietnamese advertisement ran on radio station KVVN in Alameda, Santa Clara, Santa Cruz and San Mateo Counties.

To help income-qualified customers enroll in CARE, PG&E contracted with 158 Community Outreach Contractors (COCs) throughout its service area. These COCs represent a variety of communities, including African Americans, Hispanics, Asian Pacific Islander Americans (Chinese, Vietnamese, Laotian, Hmong), Native Americans, seniors, rural communities, agricultural workers, sub-metered tenants, and nonprofit living facilities.

To reach new customers that are tech and web savvy, PG&E created a CARE Facebook fan page in October 2009. The fan page allowed PG&E to generate awareness about the program and encourage customers to apply online through the fan page itself. As part of its on-going enhancement, PG&E shared a powerful success story about the Vega family via a three minute video vignette starting in June.

PG&E's CARE Program worked with third-party vendors to enroll eligible customers via automated telephone enrollment and door-to-door canvassing:

- Automated Telephone Enrollment – PG&E contracted with a third-party vendor to enroll new customers and recertify existing customers by telephone. Year-to-date, PG&E has enrolled 60,773 new customers and recertified 49,930 existing customers through this method.

- Door-to-Door Canvassing – PG&E contracted with third-party vendors, who conducted door-to-door campaigns to enroll hard-to-reach customers who typically would not respond to traditional outreach initiatives such as direct mail or a bill insert. Year-to-date, PG&E has enrolled 21,634 new customers through this method.

In September, PG&E’s CARE Program participated in the following five outreach events where program representatives were available to answer questions and help customers enroll in the program:

- 2010 Downtown San Rafael Market Festival on 09/02/10 and 09/16/10.
- Nummi Career Transition Center Presentation in San Jose on 09/02/10.
- 2010 DreamPack Campaign in Oakland on 09/08/10.
- 13th Annual Senior Resource Fair in San Leandro on 09/10/10.
- 5th Annual Asian Resource Fair in Fresno on 09/25/10.

2.2.2. Describe the efforts taken to reach and coordinate the CARE program with other related low income programs to reach eligible customers.

PG&E currently exchanges data with Southern California Edison (SCE) Company and Southern California Gas (SCG) Company to automatically enroll their CARE customers who also receive PG&E service. PG&E also participates in data exchanges of qualified low income customers with the Sacramento Municipal Utility District (SMUD) and Modesto Irrigation District (MID). PG&E provides natural gas in the SMUD and MID electric service areas and will automatically enroll qualified low income customers served by SMUD and MID in CARE.

PG&E utilizes an internal report to automatically enroll customers who receive LIHEAP payments, as authorized in D.02-07-033. 3,874 LIHEAP customers have been automatically enrolled in CARE in 2010.

Through PG&E’s Low Income Energy Efficiency Program (known as Energy Partners for PG&E), each home that receives LIEE services where the customer is not on the CARE rate is then signed up for the CARE discount. 1,942 LIEE participants were enrolled in CARE in September.

In addition, PG&E continues to integrate CARE and LIEE outreach efforts to effectively provide eligible customers with the knowledge and tools to access all of PG&E’s free energy services.

2.2.3. Recertification Complaints

D.08-11-031, Ordering Paragraph 90, directed the IOUs to report in their monthly and annual reports, the number of customer complaints received regarding CARE recertification efforts and the nature of the complaints beginning with the first report due on or about December 31, 2008.

PG&E reports that it received no complaints about CARE recertification in September.

2.3. Miscellaneous

D.08-11-031, Ordering Paragraph 64, granted the IOUs discretion about how to enroll eligible public housing residents in each of their service areas. In response, PG&E contracted with 10 Public Housing Authority (PHA) as a Community Outreach Contractor (COC) to enroll their eligible residents in the program.

As authorized in D.08-11-031, PG&E partnered with The Center to Promote HealthCare Access, Inc., (The Center) to launch the CARE One-E-App Pilot on September 22, 2009. One-E-App is a Web-based, one-stop eligibility system accessible at a variety of community organizations, which connects families with a range of publicly funded health and human service programs. The pilot is currently taking place in Fresno, San Joaquin, Solano, Napa, Sacramento, Humboldt, and Sonoma Counties. Income-qualified customers in these counties are able to meet with a Certified Application Assister and enroll in CARE through the One-E-App system. The Center submitted the One-E-App CARE Pilot Report to Energy Division on March 17, 2010. The pilot has resulted in 43 new enrollments to date.

74								
75	[1] Envelope and Air Sealing Measures may include outlet cover plate gaskets, attic access weatherization, weatherstripping - door, caulking and minor home repairs. Minor home repairs predominantly are door jamb repair / replacement, door repair, and window putty.							
76	[2] Water Heater Conservation Measures may include water heater blanket, low flow showerhead, water heater pipe wrap, faucet aerators.							
77	[3] Weatherization may consist of attic insulation, attic access weatherization, weatherstripping - door, caulking, & minor home repairs							
78	[4] Based on Attachment H of D0811031							
79	[5] All savings are calculated based on the following sources:							
80	M&E is from Impact Evaluation of the 2005 California LIEE Program, Final Report submitted to SCE by West Hill Energy & Computing, Inc., December 19, 2007.							
81	M&E is from the Report on the Assessment of Proposed New Program Year 2006, LIEE Program Measures by LIEE Standardization Team, April 25, 2005.							
82	M&E is from the LIEE Measure Cost Effectiveness, Final Report, June 2, 2003.							
83	06-08 DEER and PG&E Workpapers.							
84	[6] Costs exclude support costs that are included in Table 1.							
85	[7] Includes both Replacement and Repair.							
86	[8] Microwave savings are calculated on the basis of microwave electric use displacing larger, less efficient electric or gas oven/cooktop use to heat food. Where the customer has an electric oven/cooktop, electric microwave use is less than the total electric oven savings, resulting in net kWh savings. Where the customer has a gas oven/cooktop, electric microwave use is shown as a net usage increase because savings are attributed to therms. The savings assumptions used for this pilot will be verified in an impact evaluation.

¹ Enrollments via data sharing between the IOUs.

² Enrollments via data sharing between departments and/or programs within the utility.

³ Enrollments via data sharing with programs outside the IOU that serve low-income customers.

⁴ One-e-App is a pilot program set up by The Center to Promote Healthcare Access (The Center) and PG&E. The pilot will occur within two PG&E counties to implement a strategy of automatic enrollment for low income customers into the CARE program based on customers' applications or reapplications for related low income health and social welfare services (e.g., MediCAL, Healthy Families, CALKids, etc.). The goal is to develop another means by which low income families can be introduced into the CARE program and, depending on the success of the pilot, possibly expand this pilot to other counties within PG&E's service area as well as to the other IOUs.

⁵ Not including Recertification.

CERTIFICATE OF SERVICE BY ELECTRONIC MAIL

I, the undersigned, state that I am a citizen of the United States and am employed in the City and County of San Francisco; that I am over the age of eighteen (18) years and not a party to the within cause; and that my business address is 77 Beale Street, San Francisco, California 94105

On October 21, 2010, I served a true copy of:

ONE-HUNDRED AND THIRTEENTH STATUS REPORT OF PACIFIC GAS AND ELECTRIC COMPANY (U 39 M) ON THE RESULTS OF ITS LOW INCOME ENERGY EFFICIENCY AND CARE PROGRAM EFFORTS IN COMPLIANCE WITH ORDERING PARAGRAPH 17 OF DECISION 01-05-033, ISSUED MAY 7, 2001

- [XX] By Electronic Mail – serving the enclosed via e-mail transmission to each of the parties listed on the official service lists for A.08-05-022, et al., with an e-mail address.
- [XX] By U.S. Mail – by placing the enclosed for collection and mailing, in the course of ordinary business practice, with other correspondence of Pacific Gas and Electric Company, enclosed in a sealed envelope, with postage fully prepaid, addressed to those parties listed on the official service lists for, A.08-05-022, et al., without an e-mail address.

I certify and declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on this 21st day of October 2010, at San Francisco, California.
