

**Revised Scope of the California Public Utilities' Commission Low-Income
Oversight Board
Technical Advisory Committee**

Background

Section 382.1(d) states that the Low-Income Oversight Board may establish a technical advisory committee consisting of low-income service providers, utility representatives, consumer organizations, and commission staff, to assist the board and may request utility representatives and commission staff to assist the technical advisory committee.

On March 15, 2017, the LIOB formed a [Technical Advisory Committee](#), citing the statute that outlines the structure and governance of the Board. Its purpose is to enhance the outreach for CARE, ESA, and other low-income ratepayer programs through additional outreach in partnership local government agencies and their contracted partners.

Proposed Amended Charge of the LIOB TAC

A working group of Members consisting of the current TAC members (Wimbley and Delgado-Olson) and Board Member Castaneda propose to expand the charge of this Technical Advisory Committee to include providing structured feedback for the Low-Income Decision or Decisions, previous decisions and related matters. They further recommend this committee be charged with receiving updates on the [SB 1208 Report recommendations](#) outlined in the SB 1208 Report sent to the Legislature on June 30, 2023.

Proposed Members

Stamas, Wimbley, Castaneda, Delgado-Olson

**Other members may be added at the 12/15/2024 LIOB meeting*
