MONTHLY REPORT OF SOUTHERN CALIFORNIA EDISON COMPANY (U 338-E) ON LOW INCOME ASSISTANCE PROGRAMS FOR SEPTEMBER 2026

Pursuant to Decision (D.) 21-06-015, Southern California Edison Company (SCE) hereby submits the attached monthly status report on its Energy Savings Assistance (ESA), California Alternate Rates for Energy (CARE), and Family Electric Rate Assistance (FERA) programs.

The purpose of this report is to consolidate activity for the ESA, CARE, and FERA programs and provide the California Public Utilities Commission's (CPUC's) Energy Division (ED) with information to assist in analyzing these low-income programs.

This report presents year-to-date ESA, CARE, and FERA program results and expenditures through September 30, 2026.

Respectfully submitted,
JOEL M. MALLORD

Southern California Edison Company's Monthly Report for Energy Savings Assistance (ESA), California Alternate Rates for Energy (CARE), and Family Electric Rate Assistance (FERA) Programs

September 2026 Report

Southern California Edison Company (SCE) provides numerous opportunities for customers to reduce their energy bills, become more energy efficient, and receive payment arrangements or assistance in tough times. Three of these programs—all focused on helping income-qualified residents—are covered in this monthly report: Energy Savings Assistance (ESA), California Alternate Rates for Energy (CARE), and Family Electric Rate Assistance (FERA).[1] These programs directly benefit low-income customers by reducing their energy bills, increasing the comfort and safety of their homes, and promoting energy education and efficiency practices that lead to resource adequacy, and a lower carbon footprint. Budgets and goals for these programs from July 1, 2021 through December 31, 2026, were authorized in Decision (D.) 21-06-015, which provides the foundational data for this report. All program accomplishments and expenditures herein relate to calendar year 2026.

Energy Savings Assistance (ESA) Program monthly report

1. ESA PROGRAM EXECUTIVE SUMMARY

1.1 ESA Program Overview

The objective of SCE's Energy Savings Assistance (ESA) program is to help income-qualified customers reduce their energy consumption and costs while increasing their health, comfort, and safety at no additional cost to them. Through the ESA program, SCE offers several energy-efficient appliances to income-qualified customers, including energy-efficient refrigerators, air conditioners, and home-efficiency solutions like weatherization that can help customers save energy and money. SCE currently has four individual programs under its ESA umbrella: ESA Main, which is available to income-qualified customers living in single-family or mobile homes; Southern Multifamily

[1] SCE has provided monthly reports for the CARE and Low-Income Energy Efficiency (now ESA) programs since 2001. See D.01-05-033, Ordering Paragraph (OP) 17. SCE began including monthly FERA metrics beginning in 2022. *See* D.21-06-015 at 435.

Whole Building (MFWB) program, which is available in multifamily dwellings; ESA Whole Home, for high energy users, and ESA Building Electrification (BE) pilot. To be eligible for an ESA program, customers may be homeowners or renters and must meet the program's income guidelines, which are established by the California Public Utilities Commission (CPUC or Commission) and updated annually. Specific measures are authorized according to criteria observed in each home for existing appliances and feasibility of installation.

The ESA Main program shifted focus from a household treatment model to a deeper energy savings model prioritizing enrolling customers with higher energy usage. As a result of the program shift, SCE implemented the following program-wide changes in 2023; however, SCE plans to continue these offerings through the end of the program cycle in 2026.

1. *Tiered Offering – Basic and Basic Plus.* Whether a customer qualifies for Basic vs. Basic Plus offering is based on their average energy use. Those who qualify for Basic Plus are considered high-energy-use customers, or 200% above normal baseline levels. Qualified Basic customers (below 200% baseline electricity usage) are eligible for Light-Emitting Diodes (LEDs) lighting, smart power strips, refrigerators, smart communicating thermostats, clothes washers, dishwashers, freezers, pool pumps, evaporative coolers, weatherization services, Heat Pump Water Heaters (HPWHs), non-heat pump heating, ventilation, and air conditioning (HVAC) systems and heat pump HVAC systems. Basic Plus includes all the Basic offerings as well as additional heating/cooling measures (e.g., Portable Air Conditioners and Room Air Conditioners). These latter measures are more complicated and expensive to install, and typically less cost-effective, but the offerings are necessary to obtain deeper energy savings in high energy usage homes.
2. *Fuel Substitution measures are also being offered.* SCE is offering highly-efficient heat pump HVAC systems and HPWHs to replace gas and propane fueled systems where feasible. The ESA program, along with the SCE-approved contractors, aims to educate SCE customers on the benefits of electrification through these new offerings.

1.1.1 Provide a summary of the ESA Program elements as approved in D.21-06-015.

ESA Main

ESA Table 1.1.1.1 ESA Main (SF, MH) Program Summary of Expenses and Savings for 2026			
	2026 Authorized/ Planning Assumptions[2]	**Actual to Date[3]**	**%**
Budget[4] [5]	$84,428,319	$69,018,402	82%
Homes Treated	56,806	45,139	79%
kWh Saved [6]	25,051,480	21,282,459	85%
kW Demand Reduced	9,855	3,283	33%
Therms Saved	289,314	(58,137)	-20%
GHG Emissions Reduced (Tons)[6]	N/A	N/A	N/A

[2] Authorized ESA budget, energy savings goals and household treatment target per Table 5 of Attachment 1, D.21-06-015. The 2026 goals for kWh, kW, and therms include ESA Main and MFWB; however, the above table reports result only from ESA Main and does not include results from MFWB.

[3] As shown in ESA Monthly Report Table 1 and Table 2.

[4] ESA Main program budget includes measures and PA budget categories as shown on ESA Monthly Report Table 1.

[5] The increase in 2026 Authorized/Planning Assumptions reflects the fund shift of $33.9 million that was accepted by the Energy Division disposition of SCE's Advice Letter 5852-E, effective August 9, 2026.

[6] Derived by utilizing the United States Environmental Protection Agency GHG Equivalencies Calculator.

SCE's ESA Main program directly serves Single-Family (SF) and Mobile Home (MH) residential customers. To qualify for ESA Main, households must receive electricity service from SCE, meet the program's income guidelines, and meet feasibility requirements for measure installation. The program is available to both homeowners and renters (renters must have the homeowner's written permission before receiving certain program measures and services).

There are three stages in the ESA Main program. Each stage is delivered by an SCE-approved contractor. First, the enrollment and assessment stage occur when an ESA contractor confirms the customer's income eligibility and does a walk-through of the home to collect information to help SCE determine the potential for installation of one or more appliances or services. Second, the installation stage occurs when the appliances are delivered, replaced, and installed. Third, the final stage occurs when an inspection is conducted in the home to verify that the contractor has completed the work to meet quality standards. If the work is not done properly, it will be redone at no cost to the customer.

As of September 30, 2026, SCE has spent 82% of the year's ESA Main program budget. This includes both measures and Program Administrative (PA) budget categories.

Expansion of ESA Budget

The ESA Program continues to experience expenditures above the original 2026 ESA Main budget, driven by strong customer demand, a substantial pipeline of enrolled customers progressing through installation, sustained contractor production, changes in measure mix, and increased program delivery costs. To support continued program operations and avoid disruptions to customer service,

SCE submitted Advice Letter 5852-E[7] on July 9, 2026, requesting approval to shift approximately $33.9 million of unspent and uncommitted funds from the Clean Energy Homes (CEH) Pilot, ESA Whole Home Pilot (Pilot Plus/Pilot Deep), and Southern Multifamily Whole Building (SMFWB) Program to the ESA Main program. The CPUC's Energy Division approved Advice Letter 5852-E on August 18, 2026, with an effective date of August 9, 2026, providing additional funding flexibility to support ongoing customer enrollments, measure installations, and inspections, maintain service to income-qualified customers, support achievement of program objectives, and facilitate an orderly transition into the next ESA program cycle.

The ESA Main Program continued to experience strong program delivery in September 2026, with 45,139 homes treated compared to 41,209 homes treated in September 2025 – an approximately 10% year over year increase. Over the same period, annual electric energy savings increased from 14.8 million kWh to 21.3 million kWh, an increase of approximately 44%. The increase in customer participation and energy savings reflects the program's expanded activity and higher production levels in 2026. The increased program expenditures observed in 2026 are consistent with this growth, as more households were served and more energy-efficient measures were installed compared to the same point in 2025.

Update on Contractor Advanced Payments

SCE continues to track advanced payments issued to contractors. Repayments started in September 2024 and have continued to date. See ESA

---

7 Advice Letter 5852-E Southern California Edison Company's Request to Shift Funds between Energy Saving Assistance Portfolio Programs with Disposition: https://edisonintl.sharepoint.com/teams/Public/TM2/Shared%20Documents/Forms/AllItems.aspx?id=%2Fteams%2FPublic%2FTM2%2FShared%20Documents%2FPublic%2FRegulatory%2FFilings%2DAdvice%20Letters%2FApproved%2FElectric%2FELECTRIC%5F5852%2DE%2Epdf&parent=%2Fteams%2FPublic%2FTM2%2FShared%20Documents%2FPublic%2FRegulatory%2FFilings%2DAdvice%20Letters%2FApproved%2FElectric.

Table 10 in Appendix A for balances. In September 2026, payments for two prime contractors were not made. SCE expects the missed payments to be made in October 2026 or netted against amounts SCE owes to one or more contractors. Additionally, another prime contractor paid off their remaining advance payment balance in full. SCE is committed to supporting the contractors in their continued efforts to serve more customers in the remainder of the program cycle. SCE expects all payments to be completed by December 2026.

Update on Contractor Overpayments

SCE has implemented corrective actions related to inadvertent overpayments to ESA contractors and vendors that were identified through internal audit activities. To accelerate payment timelines to improve contractor cash flow, among other reasons, SCE implemented changes to the ESA iEnergy payment process that enabled ESA contractors to receive payments more quickly and more frequently. These enhancements created unintended processing conditions that caused certain payments to be duplicated, which were subsequently identified and addressed through corrective controls.

Contractor and vendor reconciliation efforts remain ongoing and have identified an estimated $4.7 million in potential overpayments across most participating ESA contractors and vendors. SCE is currently evaluating recovery options, and SCE will work with contractors to minimize business impacts, while ensuring that overpayments are netted against future payments or otherwise paid back.

In parallel, SCE has strengthened preventive controls through monthly reconciliation processes, enhanced invoice validation reviews, and standardized overpayment monitoring. Recent validation activities confirmed that the overpayment detection tools and manual review controls are operating as intended, providing reasonable assurance that future potential overpayments will not occur. Development of longer-term system enhancements remains underway to further automate overpayment prevention and reduce reliance on manual controls. SCE will provide progress updates on its reconciliation and recovery

efforts and will update applicable reporting once the reconciliation process is finalized.

Claimable kWh Calculations

ESA Table 1.1.1.1.a Claimable kWh (Year to Date)		
Total Savings Methodology	**kWh (Year to Date)**	**% of 2026 Authorized Forecasted Planning Assumptions**
As Reported	21,282,459	85%
As Reported with Heat Pump Negative Savings Removed	22,234,448	89%
As Reported with Heat Pump Negative Savings Removed and Replaced with Claimable kWh	24,720,961	99%

ESA Table 1.1.1.1.a, Claimable kWh, presents a comparison of total savings in kWh determined by the methodology of savings calculations. The reported savings are 21,282,459 kWh, which accounts for 85% of the forecast. When heat pump negative savings are removed, the savings amount increases to 22,234,448 kWh, representing 89% of the forecast. Furthermore, when these negative savings are replaced with claimable kWh, the total savings amount rises to 24,720,961 kWh, achieving 99% of the forecast. This table underscores the impact of how savings calculations methodologies affect kWh savings.

For a detailed breakdown of ESA program expenses,
see the ESA Expenses Summary Table in Appendix A.

ESA Administrative Expenses

ESA Table 1.1.1.2 ESA Program Administrative Expenses for 2026	
	YTD
Administrative Expenses	$4,200,231
Total Program Costs	$69,018,402
% Administrative Spend of Total	6%

Administrative expenses are capped at 10% of the program costs in program year 2026. The calculation of the percentage of administrative expenses has been adjusted to be consistent with the energy efficiency programs per D.21-06-015. Costs such as marketing and outreach, evaluation, and training were included in administrative expenses in previous reports but have been removed.

For a detailed breakdown of ESA Main metrics, see the following Tables in Appendix A:

- **ESA Table 2 – Installations**
- **ESA Table 3A – Energy & Bill Savings**
- **ESA Table 4A – Homes / Buildings Treated**
- **ESA Table 5A – Customer Summary**

Southern Multifamily Whole Building (MFWB) Program

ESA Table 1.1.1.3 MFWB (In-Unit, CAM/WB)[8] Summary of Expenses and Savings for 2026 by IOU			
	2026 Authorized / Planning Assumptions	**Actual to Date**	**%**
Budget[9]	$23,103,079	$7,405,632	32%
Properties Treated	80	30	38%
Homes Treated (in Unit)	15,359	6,102	40%
kWh Saved	10,561,043	1,229,402	12%
kW Demand Reduced	N/A	158	N/A
Therms Saved	NA	44,897	N/A
GHG Emissions Reduced (tons)	N/A	N/A	N/A

The Southern MFWB program is designed to deliver whole-building energy efficiency, electrification, health, and safety upgrades to income-qualified multifamily property owners and residents. Through a whole-building approach, eligible multifamily properties who meet applicable income qualifications and building requirements may receive whole building, common area, and in-unit measures. The Southern MFWB program serves both deed and non-deed restricted multifamily buildings within the territories of SCE, SoCalGas, and San

[8] Budget does not include budget and spend allocated to the single point of contact (SPOC). MFWB program budget includes In-Unit (after May 2023), WB, SPOC, and Implementer administrative budget categories as shown on ESA Monthly Report Table 1.

[9] The updated budget reflects the 2026 MFWB authorized budget of $12,334,249 and remaining 2025 carryforward of $10,768,830, net of the $15,691,244 fund shift authorized in AL 5852-E.

Diego Gas and Electric (SDG&E). The Southern MFWB program is implemented by Resource Innovations (RI), formerly known as Richard Heath & Associates (RHA). Resource Innovations is a non-utility, third party implementer.

Upon completion of property treatments, the lead utility, SDG&E, will conduct inspections prior to payment approval. Only when payments are approved will SCE receive notice of project completion, which may result in reported delays. In the table above, "Properties Treated" refers to Common Area and Whole Building projects. These projects include the installation of measures within the properties' common area and/or the replacement of appliances that serve the whole building. This table also outlines specific budget and planning assumptions unique to SCE, and actual figures accumulated year-to-date for the Southern MFWB program.

As of September, program activity includes a total of 6,102 treated dwelling units and 30 completed Common Area projects. Program efforts during the reporting period remained focused on tenant-level installations and the completion of Common Area projects currently in progress. Additional Common Area projects are being evaluated for completion during the current program year.

For a detailed breakdown of ESA Southern MFWB metrics, see the following Tables in Appendix A:

- **ESA Table 2A – Installations & Expenses**
- **ESA Table 3B – Energy & Bill Savings (In Unit)**
- **ESA Table 3C – Energy & Bill Savings (Building)**
- **ESA Table 4B – Homes / Buildings Treated (In Unit)**
- **ESA Table 4C – Homes / Buildings Treated (Building)**
- **ESA Table 5B – Customer Summary (In Unit)**
- **ESA Table 5C – Customer Summary (Building)**

ESA Whole Home

ESA Table 1.1.1.4 ESA Whole Home Summary of Expenses and Savings for 2026			
	2026 Authorized/ Planning Assumptions[10]	**Actual to Date**	**%**
Budget[11]	$4,249,515	$3,819,180	90%
Homes Treated	400	404	101%
kWh Saved	N/A	1,121,821	N/A
kW Demand Reduced	N/A	138	N/A
Therms Saved	N/A	46,866	N/A
N/A GHG Emissions Reduced (tons)	N/A	N/A	N/A

In D.21-06-015, the Commission approved a pilot-based redesign of the ESA Program based on Energy Division recommendations. The redesigned pilot, known as ESA Pilot Plus/Deep (PP/D) or ESA Whole Home (ESA WH), is a joint effort between SCE and SoCalGas targeting high-usage CARE customers in shared service areas. Maroma Energy Services (Maroma) was selected as the implementer in late 2022 and E Source (formerly Illume) as the evaluator.

ESA WH was launched in May 2023, initiating enrollment and assessments. Although initial participation was limited, targeted enhancements to marketing materials and expanded email outreach contributed to consistent improvement through 2024. Installations increased by over 450% in 2025

[10] Home treatment, energy savings and GHG emissions reduction targets were not included in D.21-06-015. SCE will report on actual achievements upon completion of home treatment.

[11] Reflects the 2026 Pilot Plus and Pilot Deep authorized budget of $3,884,864 and remaining 2025 carryforward of $364,651, net of the $10,928,914 fund shift authorized in AL 5852-E.

compared to 2024, and is currently 185% above last year's home installations for the entire year.

As of September 30, 2026, 1,542 customers have enrolled in the ESA WH pilot since its inception, and the average cost per treated home is $14,239. The ESA WH team developed a forecast based on a comprehensive assessment of the current project pipeline, available field and office resource capacity, planned marketing initiatives, and overall pilot performance trends. The forecast incorporates installation work that has been completed or is currently underway but has not yet been invoiced, representing a substantial portion of the projected year-end total. In addition, anticipated conversion rates from lead to enrollment and from enrollment to installation were applied to account for potential new work. Based on this analysis, the program projected to treat and complete 475 homes by the end of 2026. As of September 30, 2026, a total of 404 homes have been treated this year. The increase in ESA WH treatment projects has correspondingly increased program expenditure. SCE is working closely with Maroma to actively manage the remaining project pipeline, monitor projects progress, and support an orderly closeout of the pilot. SCE will continue to actively manage resources across the ESA portfolio to support the completion of committed customer projects.

More information regarding ESA Whole Home outreach and enrollment is available in Section 1.2.1.

For a detailed breakdown of ESA Whole Home metrics, see the following Tables in Appendix A:

- **ESA Table 2B – Installations & Expenses**
- **ESA Table 3D – Energy & Bill Savings (Pilot Plus)**
- **ESA Table 3E – Energy & Bill Savings (Pilot Deep)**
- **ESA Table 4D – Homes / Buildings Treated**
- **ESA Table 5D – Customer Summary**

ESA Building Electrification Pilot

ESA Table 1.1.1.5 ESA BE Pilot Summary of Expenses and Savings for 2026			
	2026 Authorized/ Planning Assumptions	**Actual to Date**	**%**
Budget[12]	$23,465,335	$16,409,065	70%
Homes Treated	N/A	485	N/A
kWh Saved	N/A	(797,552)	N/A
kW Demand Reduced	N/A	48	N/A
Therms Saved	N/A	163,031	N/A
Claimable kWh Saved[13]	N/A	3,979,256	N/A
GHG Emissions Reduced (tons)	N/A	N/A	N/A

The ESA BE pilot program is an SCE-only pilot offered to income-qualified customers residing in single family homes. While it primarily focuses on customers in Disadvantaged Communities (DACs), the BE pilot is available to all income-qualified customers within SCE's service territory. The BE pilot focuses on converting space and water heating systems from natural gas to electric heat pumps, aiming to reduce energy costs and Greenhouse Gas (GHG) emissions. Select homes may also receive additional electrification measures, such as

12 The budget shown above reflects the remaining funds from the authorized program-cycle budget of $40.8M. D. 21-06-015, Ordering Paragraph (OP) 181, provides an exception to standard fund shifting limitations applicable to authorized pilots, including the Building Electrification (BE) Pilot.

13 The claimable kWh saved was calculated using methodology in Fuel Substitution Technical Guidance Document in accordance with D.19-08-009. Claimable kWh = kWh + (Therms x 29.3). The California Public Utilities Commission, Fuel Substitution Technical Guidance Document v.1; *available at* cpuc.ca.gov/-/media/cpuc-website/divisions/energy-division/documents/building-decarb/fuel-substitution-technical-guide-v11.docx.

induction cooking equipment, energy-efficient electric clothes dryers, and electrical panel upgrades.

As of September 2026, the BE Pilot had 450 projects in the active pipeline. Following the CPUC's issuance of Decision (D.) 26-07-007, which directs the BE Pilot to sunset in 2026, SCE continued advancing active projects through applicable installation, permitting, inspection, and documentation activities. SCE also continued closeout planning, including development of the closeout budget, schedule, and preparation of the Tier 1 Advice Letter framework. Remaining installations are targeted for completion by December 31, 2026.

The estimated average annual bill savings for participating customers in 2026 BE Pilot projects is $454 based on projects completed to date and may change as additional projects are completed. The estimate is calculated before installation and is based on replacing existing in-home equipment from gas to electric using current utility rates and annual usage; it assumes future consumption for all newly electrified end uses (e.g., heating, cooling, hot water, and where applicable cooking and clothes drying) remains the same and recommends a Time-of-Use (TOU) rate plan estimated to best fit the home.

SCE continued supporting project delivery, partner coordination, and targeted customer engagement focused on advancing enrolled projects toward completion before the pilot sunset. Additional implementation activities, outreach activities, and complementary electrification initiatives are discussed in Section 1.2.1.

For a detailed breakdown of ESA Building Electrification Pilot metrics, see the following Tables in Appendix A:

- **ESA Table 2C – Building Electrification Retrofit Pilot**
- **ESA Table 3F – Energy & Bill Savings (Building Electrification)**
- **ESA Table 5E – Customer Summary (Building Electrification)**

1.1.2 Program Measure Changes

If applicable, discuss any measure changes that may have taken place in ESA (SF, MH), MFWB, ESA Pilot Plus and Pilot Deep, and/or ESA BE during this reporting month.

D.21-06-015 allows the utilities, in consultation with the statewide ESA Working Group (WG), to update the measure mix through the ESA program monthly report.

SCE made no program measure changes to its ESA suite of programs and pilots in this reporting month.

1.2 ESA Program Customer Outreach and Enrollment Update

1.2.1 Provide a summary of the ESA Program outreach and enrollment strategies deployed this month.

ESA Main (SF, MH) Program Contractor Outreach

SCE's outreach efforts, with the support of its ESA program contractors, include many channels and innovative approaches to inform and enroll customers. The following section describes some of the methods SCE implements to enroll customers and conduct outreach activities that inform customers about the ESA program.

SCE continues to partner with Community-Based Organizations (CBOs) and private-sector service providers to assess homes for the delivery of ESA program services in local communities for the ESA Main program. ESA contractors are continuing to enroll customers through various methods, including SCE-generated leads and marketing initiatives, contractor outreach activities, and other leveraged efforts.

SCE continues to provide its generated leads to contractors, including those customers who reach out to the Customer Contact Center (CCC) as well as those who sign up at the SCE.com ESA webpage. SCE aims to improve marketing and outreach to raise awareness and attract leads for the ESA program.

Strategically targeted marketing campaigns, including direct mail and email, are being deployed, focusing on geographic areas with the highest potential for ESA participation and aligned with contractor priorities to support targeted deployment and efficient program delivery.

SCE's ESA contractors also perform enrollments for SoCalGas (for those customers able to jointly enroll) thereby increasing the contractors' enrollment potential and creating a better, more streamlined customer experience. ESA contractors also conduct enrollment activities such as neighborhood canvassing, door knocking, community event participation, and other activities that reach income-qualified customers. Some ESA contractors are continuing their outreach efforts and in September of 2026, generated over 1,400 outreach leads.

Southern Multifamily Whole Building (MFWB) Program

Throughout September 2026, SCE's Single Point of Contact (SPOC) conducted outreach and engagement activities with interested property owners to support awareness of and participation in the Multifamily Whole Building (MFWB) program. These efforts included evaluating potential participation opportunities and coordinating with program implementer regarding properties that may be suitable for future enrollment. By the close of the reporting period, the SPOC provided 25 property level referrals to the MFWB program and 2,967 tenant leads to the program implementer. In addition, the SPOC continued to identify and assess referral opportunities to complementary programs, including the Solar on Multifamily Affordable Housing (SOMAH) program and SCE's Charge Ready program, to support future participation and cross program coordination.

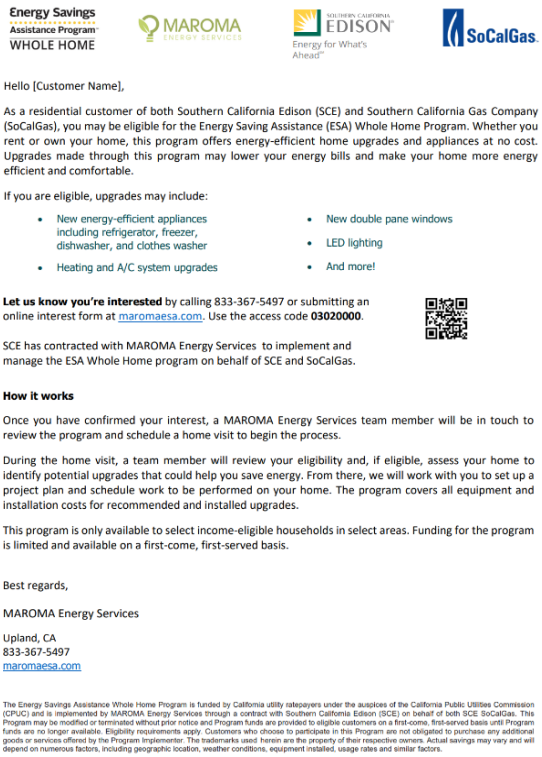

ESA Whole Home

Outreach

2026 marks the final year of the ESA Whole Home (WH) Pilot. Accordingly, marketing and outreach activities have been strategically scaled back to align with subcontractor capacity and support completion of projects

within the established timeframe. Marketing decisions were informed by lead-to-enrollment trends and overall enrollment rates. As of August 2026, no additional marketing campaigns are planned as the ESA WHP sunsets. Customer communication has transitioned to inform customers that the pilot is approaching its planned conclusion and is no longer accepting new projects. SCE and Maroma are currently working to update their respective website content with similar messaging.

Sample Letter

Energy Savings Assistance Program WHOLE HOME

MAROMA ENERGY SERVICES

SOUTHERN CALIFORNIA EDISON Energy for What's Ahead™

SoCalGas.

Hello [Customer Name],

As a residential customer of both Southern California Edison (SCE) and Southern California Gas Company (SoCalGas), you may be eligible for the Energy Saving Assistance (ESA) Whole Home Program. Whether you rent or own your home, this program offers energy-efficient home upgrades and appliances at no cost. Upgrades made through this program may lower your energy bills and make your home more energy efficient and comfortable.

If you are eligible, upgrades may include:

- New energy-efficient appliances including refrigerator, freezer, dishwasher, and clothes washer
- Heating and A/C system upgrades
- New double pane windows
- LED lighting
- And more!

Let us know you're interested by calling 833-367-5497 or submitting an online interest form at maromaesa.com. Use the access code **03020000**.

SCE has contracted with MAROMA Energy Services to implement and manage the ESA Whole Home program on behalf of SCE and SoCalGas.

How it works

Once you have confirmed your interest, a MAROMA Energy Services team member will be in touch to review the program and schedule a home visit to begin the process.

During the home visit, a team member will review your eligibility and, if eligible, assess your home to identify potential upgrades that could help you save energy. From there, we will work with you to set up a project plan and schedule work to be performed on your home. The program covers all equipment and installation costs for recommended and installed upgrades.

This program is only available to select income-eligible households in select areas. Funding for the program is limited and available on a first-come, first-served basis.

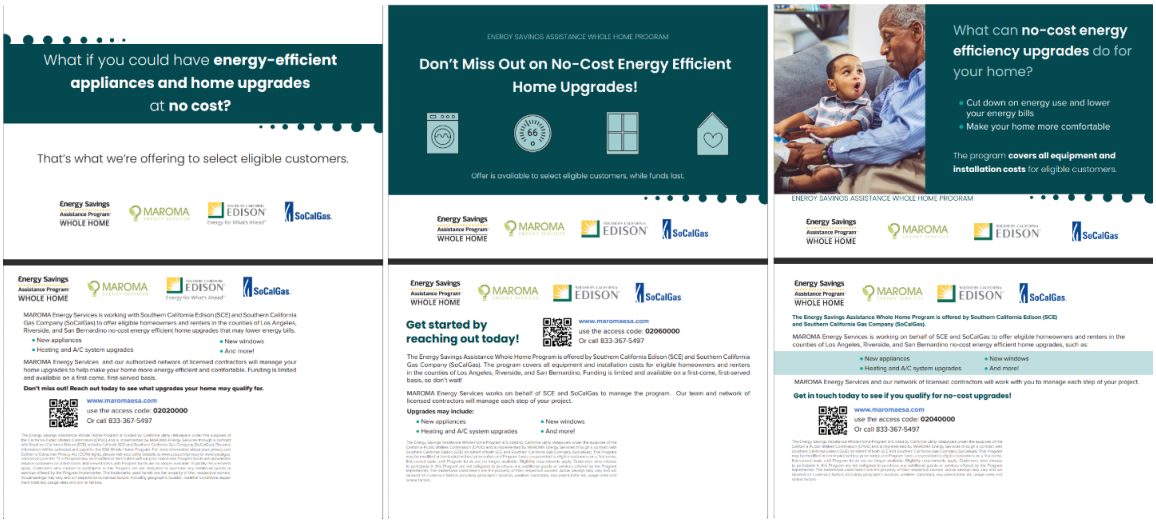

Best regards,

MAROMA Energy Services

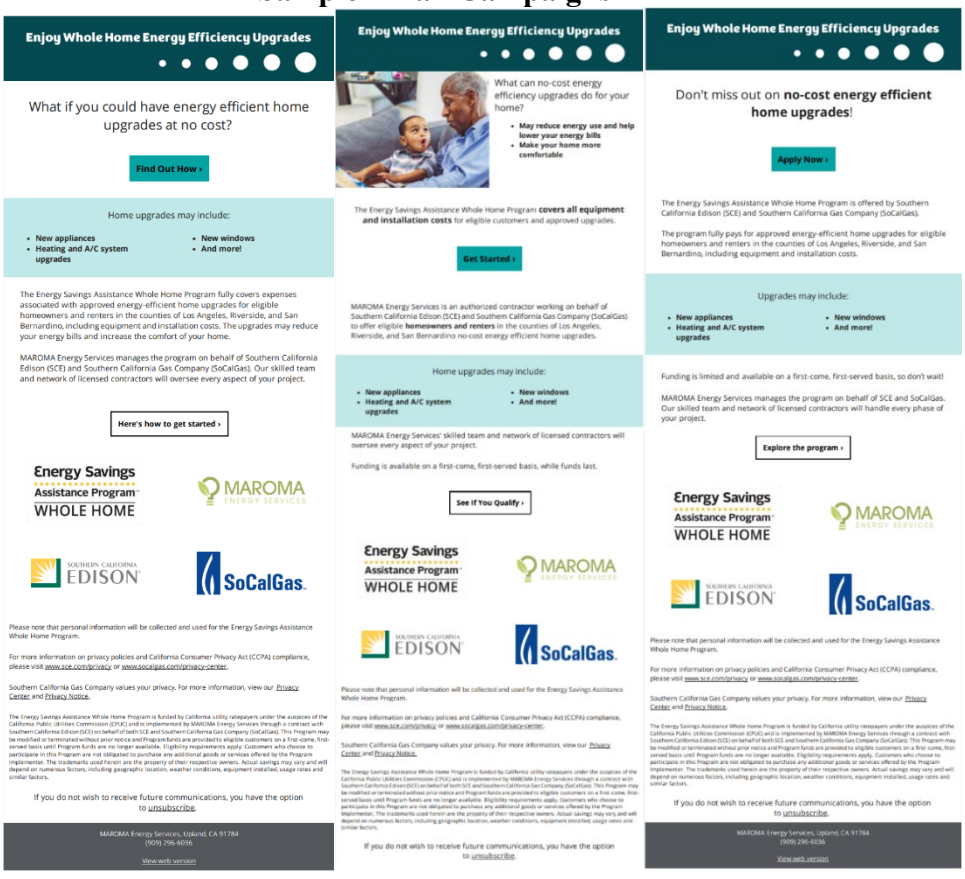

Upland, CA
833-367-5497
maromaesa.com

The Energy Savings Assistance Whole Home Program is funded by California utility ratepayers under the auspices of the California Public Utilities Commission (CPUC) and is implemented by MAROMA Energy Services through a contract with Southern California Edison (SCE) on behalf of both SCE SoCalGas. This Program may be modified or terminated without prior notice and Program funds are provided to eligible customers on a first-come, first-served basis until Program funds are no longer available. Eligibility requirements apply. Customers who choose to participate in this Program are not obligated to purchase any additional goods or services offered by the Program Implementer. The trademarks used herein are the property of their respective owners. Actual savings may vary and will depend on numerous factors, including geographic location, weather conditions, equipment installed, usage rates and similar factors.

Sample Email Campaigns

Enrollment

See section 1.1.1 for additional details. Based on the current project pipeline and observed lead-to-enrollment and enrollment-to-installation conversion trends, ESA WH previously projected treatment of 475 homes in 2026. Effective August 9, 2026, SCE, SoCalGas, and Maroma ceased accepting new pilot enrollments. The remaining customer-committed pipeline is being managed through an orderly closeout process. Projects are at varying stages of review, coordination, installation readiness, or completion. The program partners continue to monitor project status, resource availability, and customer communications to support completion of committed work and provide affected customers with timely information regarding next steps.

ESA Building Electrification (BE) Pilot

In September 2026, outreach activities remained intentionally limited and targeted as the BE Pilot continued transitioning toward completion of active projects and fulfilment of existing customer commitments. Engagement efforts focused primarily on participant support, advancing projects through installation, and customer education related to complementary resiliency and electrification offerings. Limited outreach also supported opportunities to coordinate the BE Pilot with the battery storage initiative and planning for the electrification of up to 10 mobile/manufactured homes.

SCE maintained regular coordination with local partners and program stakeholders regarding project implementation and participant engagement activities. During the month, SCE also supported customer engagement associated with Wildfire Mitigation, and battery storage initiatives to increase awareness of available resiliency benefits and complementary electrification opportunities. As of September 30th, 26 customers had expressed interest in the battery storage initiative. Two of those customers received and had installed battery storage systems, and the remaining interested customers continue to be evaluated for potential participation in the initiative.

Participation in the EPRI Smart Panel Field Study also continued during September. As of month-end, 8 smart panel installations have been completed year-to-date, and one project remains to be completed. These activities contribute to the ongoing evaluation of smart panel technologies and their potential role in facilitating residential electrification, improving load management, and supporting future grid integration opportunities.

As of September 2026, the BE pilot has completed electrification retrofits in 955 income-qualified homes since pilot launch, including 485 homes completed year-to-date. The remaining pipeline of 450 projects reflects the pilot's continued emphasis on advancing enrolled customers through installation, supporting successful project closeout, and documenting lessons learned that may help inform future income-qualified electrification initiatives and program design considerations.

ESA BE Pilot Progress through September 30, 2026

Project Status	Number of Homes
Enrollment phase (home assessment, scope development, etc.)	250
Installation in progress (procuring equipment and permits, electrical upgrades, etc.)	177
Installations complete, pending final documentation (completing Title 24, permit inspection, etc.)	23
Subtotal	**450**
Homes Treated	485
TOTAL	**935**

Language Line

SCE continues to utilize Focus International to provide real-time language translations services. These services support program enrollment and outreach activities, as well as installation and inspection field operations, by enabling personnel to effectively address language barriers while performing their assigned responsibilities. Translation support is available in multiple languages, including American Sign Language (ASL).

The table below presents the number of translation calls by language for September 2026.

Language	Number of Calls
Korean	3

Tribal Outreach

The Tribal team maintains ongoing engagement with Tribal communities to encourage participation in the Mini Grant Program and expand awareness of SCE's income-qualified offerings. These efforts are designed to equip Tribal leaders to serve as trusted community messengers, helping increase program awareness, enrollments, and installations.

Year to date through September, the SCE Tribal team participated in 45 Tribal safety meetings and events as part of its continued engagement with Tribal communities. In September, SCE supported the Coachella Valley College Fair with Agua Caliente.

For a detailed breakdown of SCE's Tribal metrics, see the following Tables in Appendix A:

- **ESA Table 8 – Clean Energy Referral, Leveraging, and Coordination**
- **ESA Table 9 – Tribal Outreach**

1.2.2 Customer Assistance Marketing, Education and Outreach for the ESA Program.

General Awareness Marketing

Online Advertising, Social Media, & Radio

Paid Search, Google Performance Max (PMax), social media, and banner advertising concluded on September 16, 2026.

Direct Marketing

SCE direct marketing efforts for this reporting month included:

Email

Email outreach continued in September 2026 to support lead generation efforts. The acquisition email campaign was deployed in September 2026 to a targeted audience of up to 60,000 customers. September outreach focused on customers located within a refined geographic targeting strategy intended to improve program awareness and engagement.

The **Energy Savings Assistance (ESA) program** helps you save on more than just energy bills. You can also get free energy-efficient appliances—plus free installation*—to help reduce electricity use and make life at home a little more comfortable.

See If You Qualify

- SCE customers who own or rent a single-family home, duplex, triplex, or fourplex
- Customers who meet program income guidelines

Apply Now

Free Energy-Saving Appliances

Below are just a few of the many available appliances you may qualify to receive for free* to help lower monthly electricity bills.

- Refrigerator
- Freezer
- Clothes washer
- Dishwasher
- Heat pump water heater
- Plus more, including products and services

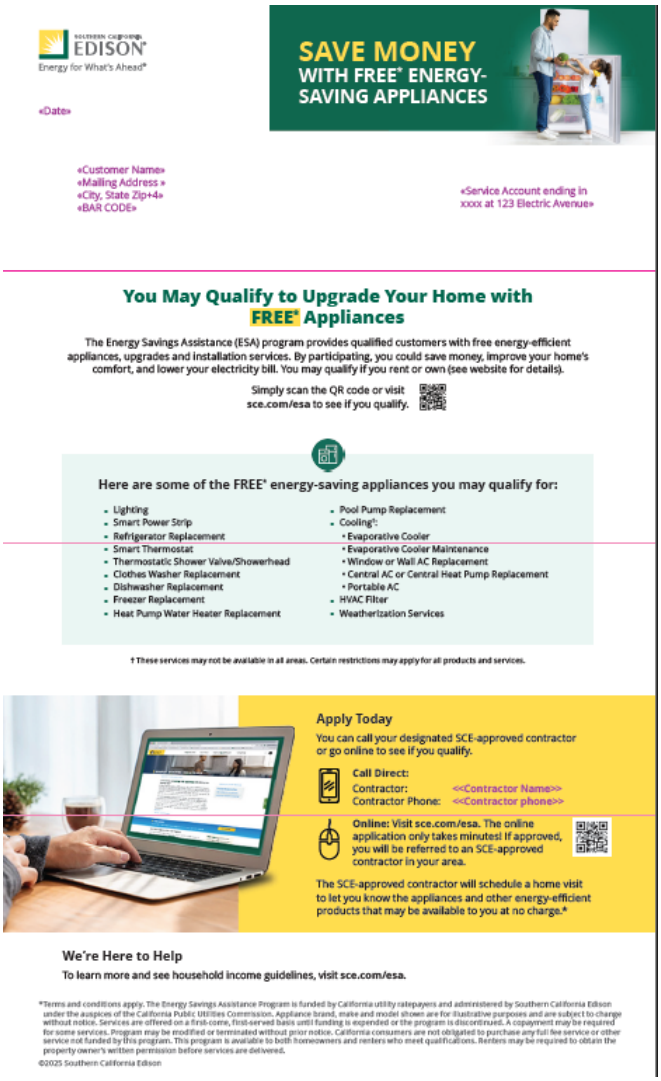

Get Started

Applying is quick and easy. For help, schedule a home visit with your SCE-approved and assigned contractor: <Contractor_Name> at <(XXX) XXX-XXXX>; or log in to My Account to submit your application directly.

Explore Free Replacement Options

Direct Mail

Direct mail activities did not occur during September. Following a review of outreach performance and program needs, direct mail is expected to remain a limited communication channel for the remainder of 2026 and may be deployed on a targeted, case-by-case basis where it is determined to be the most effective method for reaching specific customer segments or supporting localized outreach objectives.

You May Qualify to Upgrade Your Home with FREE* Appliances

The Energy Savings Assistance (ESA) program provides qualified customers with free energy-efficient appliances, upgrades and installation services. By participating, you could save money, improve your home's comfort, and lower your electricity bill. You may qualify if you rent or own (see website for details).

Simply scan the QR code or visit sce.com/esa to see if you qualify.

Here are some of the FREE* energy-saving appliances you may qualify for:

- Lighting
- Smart Power Strip
- Refrigerator Replacement
- Smart Thermostat
- Thermostatic Shower Valve/Showerhead
- Clothes Washer Replacement
- Dishwasher Replacement
- Freezer Replacement
- Heat Pump Water Heater Replacement
- Pool Pump Replacement
- Cooling†:
  - Evaporative Cooler
  - Evaporative Cooler Maintenance
  - Window or Wall AC Replacement
  - Central AC or Central Heat Pump Replacement
  - Portable AC
- HVAC Filter
- Weatherization Services

† These services may not be available in all areas. Certain restrictions may apply for all products and services.

Apply Today

You can call your designated SCE-approved contractor or go online to see if you qualify.

Call Direct:
Contractor: <<Contractor Name>>
Contractor Phone: <<Contractor phone>>

Online: Visit sce.com/esa. The online application only takes minutes! If approved, you will be referred to an SCE-approved contractor in your area.

The SCE-approved contractor will schedule a home visit to let you know the appliances and other energy-efficient products that may be available to you at no charge.*

We're Here to Help

To learn more and see household income guidelines, visit sce.com/esa.

*Terms and conditions apply. The Energy Savings Assistance Program is funded by California utility ratepayers and administered by Southern California Edison under the auspices of the California Public Utilities Commission. Appliance brand, make and model shown are for illustrative purposes and are subject to change without notice. Services are offered on a first-come, first-served basis until funding is expended or the program is discontinued. A copayment may be required for some services. Program may be modified or terminated without prior notice. California consumers are not obligated to purchase any full fee service or other service not funded by this program. This program is available to both homeowners and renters who meet qualifications. Renters may be required to obtain the property owner's written permission before services are delivered.

©2025 Southern California Edison

Co-Marketing

The ESA program is taking advantage of cross-promotional opportunities within SCE, such as co-marketing with other customer programs. SCE produced a trifold brochure that is used in acquisition campaigns for other programs. The

brochure highlights various ESA appliances that may be available to customers, as well as electrification measures such as HPWHs. This brochure was included in various program direct mail campaigns over the past few months, including those for the Arrearage Management Plan (AMP), LIHEAP and MBL programs.

Sample ESA Brochure

Community Outreach and Engagement

CBO Activities

SCE is committed to implementing additional marketing and outreach activities to increase program awareness and drive customer interest. In collaboration with Corporate Communications, SCE developed customizable outreach toolkits for Community-Based Organizations (CBOs) that include ready-to-use email content, social media assets, and program messaging designed to support Income Qualified Programs (IQPs). On September 30, 2026, SCE hosted its quarterly CBO webinar, with 68 attendees participating. The webinar provided community partners with updates, tools, and resources to help support customer preparedness, resiliency, and access to available assistance programs. During the session, SCE shared information about 2-1-1 services available to assist

customers with preparedness, outage response, and community resource navigation. SCE also provided an overview of the Access and Functional Needs (AFN) Self-ID Survey and its role in enhancing customer communications and support efforts. Additional topics included Emergency Customer Protections available to eligible customers following declared emergencies, updates on income-qualified assistance programs and bill assistance resources, and partner resources such as California LifeLine and Internet for All, which offer eligible customers access to affordable telecommunications and internet services. The webinar also reinforced the important role CBO partners play in connecting customers to preparedness, resiliency, communication, and financial assistance resources.

Multicultural Outreach

On September 28, 2026, SCE hosted a Hispanic Heritage Month recognition event at the Irwindale Education Center. The event supported SCE's customer and community outreach objectives by creating a culturally relevant forum to share program information, connect attendees with available assistance and energy resources, and encourage participation in programs serving income-qualified customers.

The event also strengthened relationships with customers and community partners through direct engagement, responsive support, and visible leadership, reinforcing SCE's commitment to equitable access, trusted partnerships, and sustained outreach in the communities it serves.

For a detailed breakdown of SCE's customer segmentation, see the following table in Appendix A:

ESA Table 7 - Customer Segments/Needs State by Demographic, Financial, Location, and Health Conditions.

Other Customer Engagement Efforts

To date this year, SCE participated in 158 Income Qualified Program (IQP) focused outreach events across the service territory. During September, SCE strengthened community awareness and access to customer assistance programs through targeted outreach at workforce, educational, disaster recovery, and community-based events. These efforts reached more than 1,200 community members and resulted in over 560 meaningful customer engagements, helping connect customers to Income Qualified Programs, Medical Baseline, PSPS preparedness resources, Access and Functional Needs support, and energy education opportunities. Outreach activities generated more than 85 customer and educational resource subscriptions, expanded in-language support, and fostered stronger engagement with students, educators, families, job seekers, and wildfire-impacted residents. These interactions continue to advance SCE's commitment to improving resource awareness, accessibility, resilience, and customer preparedness across the communities it serves.

Load Disaggregation Reporting

SCE's Load Disaggregation Reporting tool supports compliance with D.17-12-009 by providing CARE customers with personalized insights into household energy usage by end use over time. Reports are available through the SCE My Account portal in six languages: English, Spanish, Chinese (Mandarin), Korean, and Vietnamese. The tool continues to support customer education and engagement efforts by helping customers better understand their energy usage patterns and identify opportunities to manage consumption. ESA contractors also utilize the reports to provide tailored energy-efficiency recommendations based on customers' actual usage data. In September 2026, a total of 144,196 reports were successfully delivered, and 76,390 reports were opened by customers. Report volumes continue to trend upward; however, overall volumes remained below historical averages.

During September, SCE, Uplight, and IT partners identified the root cause of the reduced report volumes. Customer account changes, such as service

transfers or administrative-related updates, were causing active customer accounts to be incorrectly excluded from reporting. A custom enhancement has been defined to ensure active contract accounts remain eligible for reporting, with implementation targeted for October pending final scheduling. SCE is also evaluating historical customer volumes to determine the appropriate approach for reconciling previously excluded customer records and will continue to provide updates as the remediation plan progresses.

Customer Contact Center, Branch Offices, and Payment Offices

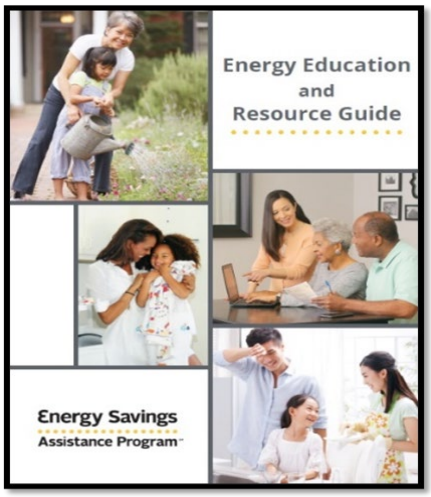

Customers who call SCE's Customer Contact Center (CCC) are informed of and referred to the ESA program. Customers are assigned to contractors in their service areas. The ESA contractors follow up on the leads and contact the customer to assess eligibility and program enrollment. In September of 2026, SCE received about than 700 ESA-related calls from interested customers.

1.2.3 Managing Energy Use

SCE contractors regularly go through the ESA program's Customer Energy Education and Resource Guide with each ESA participant, either face-to-face or through virtual means. The guide, accessible in print and digital (PDF) formats in seven distinct languages, can also be provided in Braille, upon request. The guide's primary objective is to equip low-income customers with the necessary information to help them save energy and decrease their utility expenses. It includes a step-by-step guide on how to register for SCE My Account, our online self-service portal on SCE.com. This portal provides our customers with additional resources and opportunities to help them save time,

energy, and costs, and to engage in residential energy efficiency rebate and demand response programs.

ESA Assistance Program Energy Education and Resource Guide

1.2.4 Services to Reduce Energy Bill

ESA contractors must provide at least 20 minutes of in-home energy education during their enrollment and assessment visit with the customer. This education covers energy-saving techniques and specific cost-saving strategies for the customer's home. Additionally, contractors provide information on programs like AMP, MBL, and other assistance programs, to inform customers about bill-related options for reducing their energy costs. ESA contractors also encourage customers to visit SCE.com/residential/assistance to explore all of SCE's financial assistance programs. ESA contractors serve as a valuable communication channel, informing customers about the benefits and resources available through SCE, state agencies, and local programs.

1.2.5 Additional Activities

ESA Outreach Contractors

SCE is partnering with outreach organizations to enhance community-based engagement, marketing, and lead-generation efforts for the ESA program. These organizations focus on reaching underserved and hard-to-reach communities by participating in local events and collaborating with community partners. While they do not conduct in-home visits, the customer leads they collect are referred to SCE's existing ESA contractors for follow-up and potential enrollment. This strategy expands program visibility, strengthens local partnerships, and supports increased ESA participation throughout the remainder of the program cycle.

SASH Program Referrals

Per D.16-11-022, OP 84, SCE is required to provide the Single-Family Affordable Solar Homes (SASH) Program Administrator (GRID Alternatives) with a list of CARE high-usage customers in owner-occupied, single-family households who have previously participated in the ESA program or have successfully appealed their removal from the CARE rate. On a monthly basis, SCE runs various reports to determine if customers previously enrolled in ESA meet the criteria above. If they do, SCE sends the customer referrals to GRID Alternatives through an SCE SharePoint site. There was one customer referral to share in September. This referral was distributed by SCE to GRID Alternatives on September 10, 2026.

1.3 Leveraging Success Evaluation, Including California State Department of Community Services and Development (CSD)

1.3.1 Please provide a status on referrals, of the leveraging and coordination effort with CSD. Expand on activities and success rates across the list of programs from the Coordination Workshop, such as Affordable Broadband and Lifeline, as applicable to ESA, CARE and FERA. What new steps or programs have been implemented? What were the results in terms of new enrollments? Please also provide coordination efforts with the TECH program.

Currently, SCE does not have any projects to leverage with the CSD. Even with changes in measure eligibility and feasibility, no projects have been identified for reimbursement.

The Federal Communications Commission (FCC) has stated that the Affordable Connectivity Program (ACP) ended on June 1, 2024, due to a lack of funding. SCE will continue to incorporate promotional messaging on IQP materials to guide customers to the low-cost plan program website at internetforallnow.org/offers/low-cost-plans and at the dedicated phone number (844-547-2171).

For a detailed breakdown of SCE's leveraging efforts with CSD, see the following Tables in Appendix A:

- **ESA Table 2E – Installations & Expenses**
- **ESA Table 3G – Energy & Bill Savings**
- **ESA Table 4E – Homes / Buildings Treated**
- **ESA Table 5F – Customer Summary**

1.3.2 Please provide a status on coordination efforts with TECH Clean California.

ESA coordination with TECH Clean California concluded in December of 2024, since funding has been depleted. Coordination efforts continue only for

contractor training opportunities. There were no coordination efforts or training activities this month.

For a detailed breakdown of SCE's referral, leveraging, and coordination efforts, see ESA Table 8 in Appendix A.

1.4 Workforce Education & Training (WE&T)

1.4.1 Please summarize efforts to improve and expand ESA program workforce education and training. Describe steps taken to hire and train low-income workers and how such efforts differ from prior program years.

SCE continues to encourage ESA contractors to utilize its Workforce Education & Training (WE&T) resources. First, SCE's Energy Education Centers (EEC), located in Irwindale and Tulare, California, offer a wide range of low-cost and free resources for ESA contractors. SCE consistently communicates via email to all ESA contractors and vendors to keep them informed about the educational offerings at the EEC. These communications serve as reminders and invitations for them to participate in various educational programs. In September 2026, ESA offered 55 courses for contractors and vendors. Examples of the courses offered during this period include:

Course Title	Date
IHACI: (CAQI/QM/QS) AC/HP Refrigeration Module Part 3 - CAQM of Air Conditioning and Heat Pump Systems	9/23/2026
IHACI: (CAQI/QM/QS) AC HP Refrigeration Module Part 4 – CAQS of Air Conditioning and Heat Pump Systems	9/4/2026

SCE contracts with various Local Private Contractors (LPCs), CBOs, and Faith-Based Organizations (FBOs) to provide ESA program services. Many of these organizations are in low-income communities and DACs. As of September of 2026, approximately 312 individuals from these organizations supported SCE's

ESA program. SCE does not utilize or authorize any virtual Program Representatives; all ESA activities are conducted in person by approved and credentialed representatives in accordance with program requirements.

SCE awarded a contract to Proteus Inc. to implement an Energy Career Training (ECT) program, which aims to equip individuals in low-income communities and DACs with soft and technical skills. This program aligns with the WE&T objectives outlined in D.21-06-015, Section 6.13.

The program has several key objectives:

1. Hiring Local and Disadvantaged Workers: The ECT program seeks to enable the hiring of local individuals who face disadvantages in the job market.
2. Career-Ladder Opportunities: It aims to create opportunities for career development, allowing participants to progress along the career ladder.
3. Monitoring and Metrics: The program will establish metrics to monitor its effectiveness in achieving these goals.

The first four weeks of training focus on classroom learning, covering theory and concepts. In addition, the students focus on completing the Occupational Safety and Health Administration (OSHA) 10-hour construction safety training and other topics, including math concepts, construction basics, heat pump measures, refrigeration, pool pump measures, plumbing, electrical, and HVAC installations.

The 17th cohort, consisting of 12 students, started on September 19, 2026, and is expected to conclude November 12, 2026.

1.5 ESA Program Studies and Pilots

1.5.1 ESA Program Studies

Low Income Needs Assessment (LINA) Study

2028 Low Income Needs Assessment (LINA):

The 2028 LINA is the seventh iteration[14] of the statewide assessment required under Public Utilities Code §382(d), which directs the Commission to periodically evaluate the needs of low-income electricity and gas customers and determine whether existing programs—including ESA and CARE—adequately address energy burden, hardship, language needs, and other economic challenges. For this LINA study, the study team proposed an evaluation of the enrollment and eligibility verification processes for the CARE and FERA bill discount programs and an assessment of whether data sharing with state agency programs can help reduce enrollment barriers and enhance program integrity of both bill discount programs and the ESA program.

SCE, serving as the lead utility, released the RFP in July 2026. Proposals were due on July 30th. In August, the proposal review team began its review of proposals and in September, the team continued reviewing proposals received.

ESA/CARE Categorical Study

This study was completed in October of 2023. In its disposition to a Joint IOU Advice Letter, the ED found that, "the IOUs have met their obligation to conduct the second CE Study and are not required at this time to conduct another study". Given the ED's statement, no further activity has been conducted since completion of the study

[14] Previous assessment - 2025 Low Income Needs Assessment Final Report dated October 30, 2025 is *available at* https://pda.energydataweb.com/api/view/4241/2025%20LINA%20Final%20Report_103025.pdf

ESA/CARE/FERA Eligibility Study

In July 2026, the California IOUs, led by SoCalGas, began developing a Request for Proposals (RFP) to procure a qualified consultant to conduct a Low Income Program Eligibility Study. The study is intended to replicate and update the historical ESA, CARE, and FERA eligibility estimation methodology using current demographic, income, enrollment, and utility data while maintaining consistency with prior eligibility studies. The proposed scope includes reviewing and documenting the historical methodology, validating data sources, developing updated eligibility and CARE/FERA participation estimates, estimating eligible-but-not-enrolled customers, and delivering an updateable model with supporting technical documentation for future use.

In September 2026, the ESA/CARE Study Working Group met to review the CARE & FERA Eligibility Estimates Study. Following the meeting, the study presentation was uploaded to the public site for stakeholder review and comment. Stakeholders were invited to submit feedback through September 30, 2026. Instructions for accessing the presentation and submitting comments were provided.

Non-Energy Impacts Study

The Non-Energy Impacts (NEI) Study was a statewide study lead by SCE and conducted by Evergreen Economics. Based on the analysis of survey findings using a conjoint methodology, the study team developed average IOU first-year non-energy impact values for comfort, noise, and indoor air quality equal to $9, $1, and $1, respectively. The study was finalized on June 17, 2025 and posted on the CPUC Public Documents Area.[15] The IOUs updated their ESA Cost-Effectiveness Test (ESACET) inputs for comfort and noise in September of 2025

[15] Energy Savings Assistance Program Non-Energy Impacts Final Evaluation Report available at https://pda.energydataweb.com/api/view/4163/2025ES~1.PDF.

and used the updated tool in support of the PY2028-2033 cycle application. No further activity has been carried out for this study.

ESA Main Impact and Process Evaluation

The Statewide ESA Main impact and process evaluation officially kicked off in April 2026. The evaluation consultant is Demand Side Analytics (DSA) and they are contracted with the lead IOU for this work, SoCalGas. This evaluation is being conducted in accordance with D. 21-06-015.

For this study, DSA will examine PY2024 at a minimum, and if possible will include PY2025. The IOUs agreed upon PY2024 as a critical period to examine program impacts because this was the first full year after the IOUs made operational changes and therefore it reflects the new approach that focused on energy savings over the previous goal of treating every willing and feasible home.

The impact evaluation will produce estimates of ex post first year kWh, kW, and therms savings in aggregate, by fuel type, by IOU, by average participant household, and by measure and/or measure group. The process evaluation will include a benchmarking study of ESA Main against other similar low-income and market-rate whole home energy efficiency programs; a customer survey to address satisfaction, motivations to participate, and barriers to enrollment; and a leveraging study to see how other income qualified programs can simultaneously benefit participants of the ESA program.

Research activities in September included a review of an accuracy assessment completed by the consultant evaluating the program, Demand Side Analytics. This assessment is meant to help identify the methodologies best suited to evaluate the program in an unbiased manner. ESA Program staff also

responded to a questionnaire to address the consultant's questions about the program leveraging portion of the process evaluation.

ESA/CARE Study Working Group

The Commission authorized the formation of a statewide Study Working Group for the ESA and CARE programs.[16] Working Group membership is composed of IOU representatives, ED staff, and no more than two representatives from each segment of the following interest groups: contractors, CBOs, Cal Advocates, consumer protection/advocates, and other special interest groups. Assigned tasks of the Study Working Group include planning and designing statewide studies and related research for the ESA and CARE programs and providing feedback on study deliverables. On September 3rd, the Study Working Group met to continue presentations on the CARE/FERA Eligibility Study, the SDG&E Pilot Plus/Pilot Deep Evaluation, and the scoping efforts for the Statewide ESA Multifamily Whole Building Impact and Process evaluation.

1.5.2 ESA Program Pilots

Evaluation of the ESA Whole Home Pilot

The ESA WH (formerly referred to as "Pilot Plus/Deep") joint pilot evaluation was initiated in October of 2022. E Source (formerly Illume) was contracted to conduct the evaluation and subcontracted with Verdant Associates LLC for the impact evaluation segment of the research effort.

This research included both a process evaluation (in general, investigating the drivers of program performance impacts) and an impact evaluation (which measures program savings).

Process Evaluation:

- The primary process evaluation work in September included preparation

[16] D.21-06-015, Section 10.1.2.1, p. 410.

for the October 2026 ESA sub-working group. The October 14th presentation will highlight current process and impact evaluation results as well as highlight key lessons learned over the evaluation cycle. The goal of this presentation is to support IQP planning for the next program cycle.

- SCE has begun preparing this presentation with input from the implementer.
- The team completed a final round of post-installation surveys in September.
- The team completed a final round of participant interviews in September.
- A first draft of the process evaluation report is expected in October.

Impact Evaluation:

- In September, the team started development of the control group for Phase 2 of the study. This includes an additional request to get the complete set of records for all contract accounts for a premise. SCE expects to provide this data in early October.

Final Report Updated Timeline:

- Client review #1: 10/13 - 10/27
- Client review #2: 12/7 - 12/21
- Final Report in Q1 2027

Evaluation of ESA Building Electrification (BE) Pilot

The ESA Building Electrification (BE) Pilot evaluation assesses program design, implementation, customer experience, and energy and emissions impacts over the pilot lifecycle. The evaluation is intended to provide stakeholders with process and impact findings that may inform future program design, including opportunities to improve energy savings, greenhouse gas reductions, cost-effectiveness, and customer experience.

Following completion of the Interim Impact and Process Evaluation, the evaluation team completed or continued the following activities in support of the

final evaluation:

a. Evaluating participating customers' natural gas and electricity consumption patterns and energy performance.
b. Assessing the impacts of building electrification measures, including heat pump water heaters and heat pump space heating and cooling systems.
c. Assessing the impacts of supplemental energy efficiency measures, including electric appliances, weatherization upgrades, and building envelope improvements.
d. Evaluating electrical panel upgrades and other infrastructure enhancements necessary to support building electrification measures.
e. Managing and coordinating AMI and billing data requests for participating and comparison-group customers to support the final impact evaluation. The final evaluation report is expected to be delivered in Q2 2027.
f. The ESA Working Group recommended that the final impact evaluation consider analysis of available project cost information for treated homes, including electrical upgrades and panel replacements, to provide additional information regarding potential cost barriers affecting participation in fuel substitution and building electrification programs.

Interim evaluation results indicate that participating households replaced natural gas technologies with electric alternatives and experienced net energy savings, customer bill savings, high customer satisfaction, and carbon emissions reductions. A remaining evaluation question is whether scalable, and cost-effective approaches can preserve the positive customer bill impacts observed during the pilot.

For a detailed breakdown of SCE's expenditures for pilots and studies, see ESA Table 6 in Appendix A.

2. CALIFORNIA ALTERNATE RATES FOR ENERGY (CARE) EXECUTIVE SUMMARY

2.1 CARE Program Summary

The CARE program offers reduced energy rates to low-income households in SCE's service area, based on income up to 200% of the Federal Poverty Guidelines. It assists with single-family homes, sub-metered facilities, nonprofit group homes, agricultural employee housing, and migrant farm worker housing. Qualified participants can save 32.5%[17] on their monthly electricity bills.

The CARE program continues to deliver significant energy affordability benefits to income-qualified households throughout SCE's service area. CARE enrollment remained strong, exceeding the estimated eligible customer population, with more than 1.3 million participating households receiving impactful bill savings. SCE continued to advance customer outreach and enrollment efforts through targeted marketing campaigns, community-based partnerships, multilingual communications, and coordination with other income-qualified assistance programs. The program also maintained a strong focus on regulatory compliance, customer support, and continuous process improvement while implementing corrective actions and enhanced controls. Through these efforts, CARE continued to support SCE's commitment to improving energy affordability and expanding access to assistance for low-income and underserved communities.

[17] Starting January 1, 2025, the electric rate discount has been adjusted to 32.5% due to recalculations required by Assembly Bill 205. Following D.25-06-010 and effective June 1, 2025, CARE residents of Catalina Island receive the following discounts: electricity, water and gas at 32.5%.

2.1.1 Please provide CARE Program Summary Costs.

CARE Table 2.1.1.1 CARE Program Summary Costs for 2026

CARE Budget Categories	Authorized Budget[a]	Actual Expenses Year-to-Date	% of Budget Spent
Outreach	$3,708,741	$1,289,317	35%
Processing, Certification and Verification	$1,706,289	$1,690,677	99%
Post Enrollment Verification	$538,828	$138,512	26%
Information Tech/Programming	$570,000	$1,208,255	212%
CHANGES Program[b]	$525,000	$304,482	58%
Measurement & Evaluation	$81,000	$784	1%
Regulatory Compliance	$508,141	$377,114	74%
General Administration	$1,501,996	$2,324,332	155%
CPUC ED	$135,625	$12,793	9%
Total Expenses	**$9,275,620**	**$7,346,264**	**79%**
Subsidies and Benefits	$427,678,676	$815,339,544	191%
Total Program Costs & Discounts	**$436,954,296**	**$822,685,808**	**188%**

[a] D.21-06-015 and AL-4536 approved the CARE program budget for PYs 2021-2026.

[b] The CHANGES Program provides funding to CBOs to assist Limited English Proficient (LEP) customers with energy education and billing issues.

For a detailed breakdown of CARE program expenses, see CARE Table 1 in Appendix A.

System Enhancements and Program Improvements

Information Technology and Programming expenditures continue to support strategic investments that improve the reliability, efficiency, and

compliance of SCE's CARE and FERA programs. Efforts have focused on enhancing enrollment and verification processes, strengthening automated controls, improving reporting and tracking capabilities, modernizing customer communications, and addressing system-related program risks identified through ongoing operational reviews. These enhancement investments support more accurate program management, improved customer outcomes, enhanced regulatory reporting and meeting requirements, and strengthen oversight and resolution of program issues.

Through September 2026, IT expenditures totaled approximately $1.2 million compared with the expected budget of $570,000. The variance is primarily driven by contract and consulting services (74% of total expenditures) supporting CARE/FERA system enhancements. The Multiple System Enhancement Project accounts for approximately $899,000 (74%) of total expenditures and remains the primary cost driver, supporting program integrity, eligibility controls, and compliance requirements. The DMS Automation Project accounts for approximately $301,000 (25%) of total expenditures and supports ongoing automation, system modernization, and operational efficiencies to enhance program administration and customer service capabilities. Together, the Multiple System Enhancement and DMS Automation projects accounted for approximately 99% of total IT expenditures, with the remaining 1% attributable to miscellaneous IT programming activities.

2.1.2 Provide the CARE Program enrollment rate to date.

Table 2.1.2.1 CARE Program Enrollment		
Participants Enrolled	**Estimated Eligible Participants[18]**	**Enrollment Rate**
1,330,516	1,293,449	103%

For a detailed breakdown of SCE's CARE metrics, see the following Tables in Appendix A:

- **CARE Table 2 – Enrollment Overview**
- **CARE Table 3A – Post-Enrollment Verification**
- **CARE Table 3B – High-Use Verification**
- **CARE Table 4 – Enrollment by County**
- **CARE Table 5 – Recertification**
- **CARE Table 8 – Enrollment Rate for High Disconnection, High Poverty, & Disadvantaged Communities by ZIP Code**
- **CARE Table 9 – Lowest Enrollment Rates for High Disconnection, High Poverty, & Disadvantaged Communities by ZIP Code**

2.1.3 CHANGES Program

The Community Help and Awareness of Natural Gas and Electricity Services (CHANGES) program supports customers with Limited English Proficiency (LEP) through partnerships with Community-Based Organizations (CBOs).

SCE will continue to pursue opportunities to enhance the CHANGES program and strengthen collaboration among SCE, CHANGES CBOs, and LEP customers. To ensure compliance with D.15-12-047, Ordering Paragraph 18(b),

[18] On April 8, 2026, PG&E, on behalf of the IOUs, filed the Annual Estimates of CARE and FERA Eligible Customers and Related Information. This number reflects estimates of SCE's CARE-eligible participants for 2026.

SCE will formalize documentation of discussions and IOU updates presented during quarterly CHANGES meetings. Historically, CHANGES agenda topics and updates have been communicated primarily verbally; moving forward, SCE will document these discussions and distribute meeting notes to the Energy Division Lead for record-keeping purposes. In addition, CHANGES IOU leads will begin participating in the CARE/FERA monthly Joint Utility Meetings to coordinate and identify updates that may be shared at upcoming CHANGES quarterly meetings.

In May 2026, CPUC staff requested that the IOUs incorporate CHANGES program content on their websites, consistent with PG&E's approach. The most recent quarterly meeting was held on September 11, 2026. SCE confirmed that similar content had been added to its CARE/FERA webpage (www.sce.com/CARE). No other significant items were discussed.

2.2 CARE Marketing & Outreach

2.2.1 Discuss utility outreach activities and those undertaken by third parties on the utility's behalf.

SCE remains steadfast in its dedication to prioritizing outreach and communication efforts for the CARE and FERA programs, particularly focusing on underserved and linguistically diverse communities. These initiatives involve collaboration across various internal SCE departments, including Local Public Affairs, Consumer Affairs, Marketing, Corporate Communications, Strategic Engagement, and Business Solutions. In addition to internal teamwork, SCE actively engages in external outreach activities, establishing partnerships with chambers, foundations, FBOs, and CBOs to effectively reach out to hard-to-reach customer segments. SCE uses a journey-style marketing strategy to reach distinct demographics of the CARE and FERA programs. This includes channels like social media, text messages, email, SCE.com, webinars and CBO collaborations. The comprehensive CARE and FERA campaign features, updated emails, starting with an introduction and follow-up for customers identified in a funnel analysis. The mass media campaign increases awareness of potential energy bill savings from enrolling in CARE or FERA through online search and social media.

The 2026 marketing strategies are outlined below:

- The 2026 marketing strategy prioritizes FERA program enrollment growth, focusing on FERA high-propensity customers, with CARE messaging integrated as a part of the affordability approach. The strategy will leverage the FERA Propensity Model and geographic data to reach households most likely to enroll.
- Strengthening FERA engagement through high-impact, multi-channel approach, maintaining presence across key channels such as paid media, email, and direct mail with strategic outreach during moments of high-financial awareness. Specifically for email, outreach is being designed to align with timing of customer SCE bill. Marketing emails will be triggered after a customer receives its SCE bill to align with bill-related touchpoints. These high-attention moments are intended to capture customer moments of high-financial awareness and promote enrollment.
- Improving FERA retention through recertification by coordinating additional timely communication and messaging around recertification milestones.

CARE Rate Education Reports

In November 2025, SCE identified that it was not utilizing targeted, personalized Rate Education Reports (RERs) to market to customers with a high likelihood of CARE eligibility, as required. Additionally, as also required, SCE did not provide a tailored digital experience for pre-screened, potentially eligible customers within SCE's online My Account platform. These high-propensity customers continued to receive CARE marketing and outreach solicitations, and existing rate comparison tools have consistently remained available to all customers. However, these tools do not illustrate the potential bill impacts of enrolling in CARE. As of September 2026, SCE has continued progressing remediation efforts. Phase I customer outreach launched successfully on August

31, with personalized CARE Rate Education communications distributed to an initial wave of high-propensity customers based on customer communication preferences. Year-to-date, outreach volume includes 10,000 email communications, with an additional four direct mail pieces issued due to email bounce-backs. All customers in the initial outreach wave had previously identified email as their preferred communication channel. Additional outreach waves are scheduled through December 2026.

SCE also continues advancing toward deployment by end of 2026 of its Phase II My Account enhancements designed to provide a compliant digital experience for pre-screened customers, including finalizing integration requirements and implementation planning activities.

Direct Marketing

SCE focuses on identifying and assisting income-qualified customers who may benefit from its various programs and service offerings.

Email and Direct Mail

See section 2.2.1 regarding CARE Rate Education communication.

Customer Contact Center (CCC)

SCE's CCC offers various methods for customers to enroll in the CARE program. Customers can register via the dedicated CARE enrollment toll-free number using the Interactive Voice Response (IVR) system, with the option of speaking with an agent if assistance is required. Additionally, if customers call any other SCE number, they can select an IVR option to receive information about SCE programs, including CARE. When customers contact an agent regarding unrelated matters but mention needing bill assistance or experiencing financial difficulties, agents proactively provide information about CARE and other relevant programs.

Regardless of how the contact is initiated, CCC agents emphasize phone-based enrollment services. Customers can be transferred to the IVR for direct enrollment upon request, directed to SCE.com for online enrollment, or sent a CARE application via mail, according to their preference. For the month of September 2026, SCE processed 30,722 new enrollment[19] applications, with 82% received through self-service channels (online or phone).

CCC agents were also available to answer any questions related to the Base Services Charge (BSC) for CARE and FERA customers.

Community Outreach & Engagement

In September, SCE continued to collaborate with Community-Based Organizations (CBO) to identify innovative strategies to enhance future engagement efforts. Throughout the month, SCE aligned its plans to ensure consistent delivery of essential information on rates, wildfire and emergency preparedness, and CARE, FERA, ESA, and MBL programs, supporting expanded outreach through trusted CBO partners and the diverse communities they serve.

Further details on optimizing the advantages of these ongoing collaborations can be found in Section 1.2.2.

Tribal Outreach

See Section 1.2.1, Tribal Outreach.

CARE Partners (Capitation Agencies)

The Capitation Fee Program aims to encourage CBOs to collaborate with SCE to assist hard-to-reach customer populations in enrolling in the CARE and

[19] This number excludes new enrollments via Capitation Agencies.

FERA programs. The program reimburses organizations for helping income-qualified customers receive assistance through CARE or FERA programs.

The Capitation Fee Program team is continuing its efforts to engage existing Capitation Agencies (those CBOs participating in the Capitation Fee Program) while strategically registering additional contractors to overcome enrollment barriers, including language, culture, and special needs, to enroll the hardest-to-reach customers. Because of these efforts, the Capitation Fee Program continues to show enrollments from agencies that were previously inactive. As part of SCE's strategy to bolster FERA enrollments, SCE strives to recruit Capitation Agencies dedicated to recruiting FERA customers.

SCE currently has 60 Capitation Agencies participating in the program. In September of 2026, Capitation Agencies successfully enrolled 23 new customers in the CARE program. Current and ongoing campaign strategies and efforts include:

- Leveraging events sponsored by communities and cultural celebrations to reach populations that may be eligible to enroll in the CARE program.
- Partnering with SCE personnel to leverage existing SCE relationships with FBOs, CBOs, and local governments.

Utilizing existing channels to develop creative approaches for agencies to conduct CARE/FERA outreach, including community-based virtual outreach events and fairs.

CARE Capitation Agencies	
ESA Leads	NA
CARE Enrollments	23
CARE Recertification	NA

For a detailed breakdown of CARE Capitation Agency expenditures, see CARE Table 6 in Appendix A.

2.2.2 Describe the efforts taken to reach and coordinate the CARE program with other related low-income programs to reach eligible customers.

SCE enrolls new CARE customers through the Energy Assistance Fund (EAF) program. EAF is an income-qualified program that helps residential households pay their electricity bills. EAF is funded through voluntary donations from SCE employees, shareholders, and customers. EAF partners with United Way of Greater Los Angeles and more than 80 CBOs to process assistance requests and applications. In September 2026, 33 customers who received EAF grants were enrolled in CARE.

SCE uses social media, such as Facebook and Instagram, to promote EAF and inform customers on how to apply for grants.

SCE coordinates CARE enrollments with other income-qualified programs, such as ESA, LIHEAP, and programs offered by other utilities such as SoCalGas and certain water utilities. ESA participants who are not already enrolled in discounted rate programs are automatically enrolled in the appropriate program each month (if they agree to enrollment on their application forms). As described in this report, the CARE program actively integrates messaging with the ESA program through outreach events, communications, and marketing campaigns that inform attendees about the ESA and CARE programs available to qualifying customers. Additionally, LIHEAP participants are automatically enrolled in the CARE program. They also receive information about the MBL program, along with the ESA Program Brochure referenced in the ESA Marketing section of this report. SCE consistently incorporates AMP messaging across various CARE/FERA materials, including the updated application form and recently produced direct mail campaign letters. Additionally, SCE has recently improved its website by integrating a link to the AMP application when eligible

CARE/FERA customers log into their accounts via My Account. Efforts have been completed to add an AMP link to inform customers about the AMP program when they are submitting a CARE/FERA application online.

2.3 CARE Recertification Complaints

2.3.1 Report the number of customer complaints received (formal or informal, however, and wherever received) about their CARE recertification efforts, with the nature of the complaints and resolutions.

Complaints from customers regarding recertification are reported to SCE's Consumer Affairs Department. These recertification-related complaints commonly involve issues such as recertification removals, processing delays, and program eligibility/operation questions. Informal complaints originate with the Consumers Affairs Branch (CAB) of the Commission[20] and are referred to SCE's Consumer Affairs Department for resolution. In September 2026, the CARE/FERA support team received twelve informal complaints via SCE's Consumer Affairs team regarding the "recertification" process. As part of SCE's process, these customer accounts have been reviewed with the customers, assistance was provided regarding the nature of the complaint, and the matters were resolved or are in process of being resolved.

SCE also tracks formal complaints initiated with the CPUC. In September 2026, there were no formal complaints related to CARE recertification.

---

[20] The IOUs have interpreted this section to call for the disclosures of information that goes through the CAB. SCE, going forward, will also include any formal complaints filed with the CPUC on the CARE recertification. SCE has not been reporting recertification issues that arise through SCE internal channels whether these area inquiries, complaints, questions and other types of requests. Should the Commission determine that additional information is required to be reported under this section, SCE will promptly comply.

2.4 CARE Studies and Pilots

2.4.1 CARE Program Studies

Low Income Needs Assessment (LINA) Study

Refer to ESA Section 1.5.1, for LINA Study.

ESA/CARE Categorical Study

Refer to ESA Section 1.5.1 for ESA/CARE Categorical Study.

ESA/CARE/FERA Eligibility Study

Refer to ESA Section 1.5.1 for ESA/CARE/FERA Eligibility Study.

CHANGES Evaluation

In May 2025, the CPUC notified the IOUs that they planned to oversee the completion of the CHANGES evaluation, with PG&E continuing to serve as the contract manager. The other IOUs were removed from the study team. This evaluation is focused on two main objectives:

1. Benchmarking Analysis: Assess the CHANGES program by comparing its services and offerings to similar programs administered by other jurisdictions and/or existing within the IOUs.
2. Market Profile Analysis: Evaluate whether the current program design and implementation approach meets customer needs or if modifications are necessary.

The consultant delivered a draft evaluation report to the CPUC and also shared it with the IOUs in November 2025. The final evaluation report was sent to the CPUC service list on December 23, 2025. This study is concluded with no further activity expected.

2.4.2 CARE Program Pilots

There are currently no CARE pilots.

For a detailed breakdown of SCE's expenditures for Pilots and Studies, see CARE Table 7 in Appendix A.

2.5. CARE Program Post-Enrollment Verification (PEV) Freezes[21]

Per D.19-07-015, the emergency relief program activates upon issuance of a proclamation or declaration of a State of Emergency by the Governor of California or the President of the United States, referred to herein as an Emergency Protection Order (EPO). Customers qualify for consumer protections when they experience a utility service disruption, degradation in service quality, or service loss due to a disaster related to an EPO. Protections begin from the EPO date, lasting at least 12 months or longer as determined by the Governor's Office of Emergency Services. Utilities are encouraged to extend support beyond regulations, potentially offering additional assistance programs.

During EPOs, utilities are required to support low-income residential customers who are directly impacted by the disaster and "suspend all CARE and FERA program removals to avoid unintentional loss of the discounted rate during

[21] CPUC Res. M-4833 directed IOUs to freeze CARE program Post-Enrollment Verification (PEV) in the counties impacted by the California wildfires. SCE expanded the CARE PEV freeze to customers in affected counties where a state of emergency proclamation was issued by the Governor of California due to a disaster that resulted in the inability to deliver utility services to customers and remains in place for one year from the date of the proclamation. D.19-07-015 extends SCE's Emergency Consumer Protection Plan to include residential and non-residential customers in areas where a state of emergency proclamation is issued by the California Governor's Office or the President of the United States where the disaster has either resulted in the loss or disruption of the delivery or receipt of utility service, and/or resulted in the degradation of the quality of utility service.

the period for which the customer is protected."[22] As such, utilities are required to "discontinue generating all recertification and verification requests that require customers to provide their current income information."[23]

SCE previously implemented these protections at the zip code level, under which, it was intended that all CARE and FERA customers within a zip code subject to an EPO would receive the protections described above. ZIP code selection is based on whether the "event" triggering an EPO created an outage lasting 24 hours or more in an affected ZIP code. In September 2026, SCE submitted Advice Letter (5892-E) to conclude the Emergency Disaster Relief Program due to the Rancho Palos Verdes Landslides pursuant to D.19-07-015. In September 2026, 158 of 770 ZIP codes in SCE's service territory had EPOs in effect.[24]

The chart below provides an overview of the ZIP code count with expiration dates for emergency protection orders currently in effect.

ZIP Code Count	EPO Expiration Date
2	12/9/2026
5	12/23/2026
13	12/24/2026
120	01/07/2027
18	4/17/2027

SCE is now protecting directly impacted customers rather than all customers within an impacted zip code, with a notable exception of DMS customers discussed below. Directly impacted customers are defined as those who

---

22 D.19-07-015, Decision Adopting an Emergency Disaster Relief Program for Electric, Natural Gas, Water and Sewer Utility Customers

23 Order Instituting Rulemaking Regarding Emergency Disaster Relief Program, R.18-03-011 at 23.

24 It should be noted that the count and expiration dates are subject to change as new EPO events are called and causes ZIP codes to be assigned a new date later than in previous reporting.

experienced disruption, or degradation of quality of utility service during the emergency event, as outlined in D.19-07-015, Conclusion of Law 4 and 5. SCE identifies these customers through self-reports, damage assessment conducted by SCE or outside agencies, and outage data.

For DMS recertifications and traditional/high usage verifications, SCE is implementing protections at the zip code level. Under this approach, all CARE and FERA customers within a ZIP code subject to an EPO receive the protections described above. SCE intends to transition DMS recertifications and traditional/high usage verification protections from the "zip code approach" to customers who are directly impacted by the emergency event to align with protections for other customers.

In June 2025, SCE determined that from at least 2019[25] to June 2025, SCE experienced issues that resulted in verification and recertification requests being sent to a broad spectrum of CARE/FERA customers covered by EPOs. Although SCE intended to implement these EPO protections pursuant to the "ZIP code approach," due to a technical issue, SCE's system continued sending recertification and verification letters to many CARE and FERA customers, even those subject to EPO protections, and SCE continued to process program recertifications and income verifications (for example, moving customers between CARE and FERA programs) and, in some instances, removed customers from their current program.

On November 24, 2025, SCE began remediation activities for active EPOs by re-enrolling directly affected customers who were de-enrolled from CARE/FERA due to not responding to a recertification or verification request. As

---

[25] SCE initially reported that the issue started in 2021; however, SCE since determined that it went back to at least 2019. SCE is reviewing data for 2018 which is a more complex process given the subsequent system changes.

of June 2026, SCE completed the one-time billing remediation effort for CARE and FERA customers who were erroneously de-enrolled from their Income Qualified Program while under an Emergency Protection Order per D.19-07-015.[26] This remediation also addressed instances where system processing conditions resulted in partial or missed CARE discounts when de-enrollment and re-enrollment activities occurred within the same billing cycle. Billing corrections were applied through manual bill credits to restore applicable CARE/FERA benefits to impacted customers and ensure billing accuracy. All identified bill credits have been completed for EPOs issued pursuant to D.19-07-015. Customer bill messages and account activity notes have been added to document remediation actions and support customer care. SCE has reported and will continue to report in the closing Advice Letters for EPOs.

The EPO remediation results are summarized below:

	CONTRACTS	**BILL PERIODS**	**TOTAL**
CARE	2,956	17,250	$1,012,719
FERA	89	538	$23,121
Total	**3,045**	**17,788**	**$1,035,840**

[26] SCE has not yet completed its review of data for events preceding D.19-07-015.

2.6 CARE Fixed Income

The chart below shows the number of new CARE enrollments for customers who self-attested their fixed income eligibility:

Month	Count
January	3,072
February	3,377
March	3,731
April	3,869
May	2,766
June	2,782
July	3,324
August	3,859
September	3,427
YTD	30,207

2.7 Challenges encountered in administering the CARE/FERA/MBL programs

This section discusses the various challenges encountered in administering the CARE/FERA/MBL programs. Details on the issue affecting EPO-protected customers are provided in Section 2.5. Details regarding issues related to marketing efforts are provided in Section 2.2.1.

In April 2026, SCE identified a risk that CARE High Usage Verification customers may be erroneously removed from the CARE program. The issue primarily affected customers who were required to enroll in the ESA program to remain eligible. In some cases, system errors prevented the creation of ESA enrollment tasks, which meant customers were not contacted to complete required steps. In other cases, customers were removed despite successfully completing

ESA enrollment due to system mismatches between platforms. Additionally, some customers participating in the Multi-Family Whole Building program were not properly recognized as meeting ESA requirements. As a result, affected customers lost CARE program benefits until the issue was identified and corrected. SCE is actively working on this issue, including determining affected customers, re-enrolling any impacted active customers and providing bill credits to restore missed benefits. SCE has also implemented controls to prevent recurrence and continues to monitor and address the underlying issue. In September 2026, following completion of remediation activities and implementation of corrective controls, there are no further corrective actions outstanding.

In July 2026 SCE identified potential data discrepancy associated with CARE and FERA recertification extraction scripts used for reporting. In September, SCE continued actively validating the affected data, assessing impacts to previously reported figures, and reviewing its scripts and methodology. SCE plans to file an amendment to the 2021-2025 Annual Reports in October.

In August 2026, SCE identified that some tenants of Domestic Master Metered Sub-Account (DMS) customers, which include some mobile home park tenants, who participated in the ESA program were not automatically enrolled in CARE after expressing interest on their ESA enrollment application. The issue resulted from the absence of documented procedures and monitoring controls to support the manual enrollment process required for DMS customers. SCE has identified the scope of impacted tenants, and is developing a remediation plan focused on completing CARE enrollments for eligible customers, which includes bill credits to restore missed CARE benefits.

3. FAMILY ELECTRIC RATE ASSISTANCE (FERA) EXECUTIVE SUMMARY

3.1 FERA Program Summary

The FERA program offers eligible income-qualified households within SCE's service area, a monthly discount on energy rates. The FERA program primarily aids low-income customers that are unable to qualify for the CARE program. To qualify for FERA, households incomes must be above 200% but not exceeding 250% of the Federal Poverty Guidelines (FPG). Participating households, including single-family residences and those in sub-metered facilities, can save 18% on their electric bills.[27]

Throughout 2026, SCE will continue its efforts to achieve a positive adoption rate of FERA among eligible households. To support this objective, SCE continues to utilize information flyers specifically for FERA. This informational flyer will provide enrollment details, accessible through SCE's online portal or toll-free IVR system. Additionally, customers can submit the CARE/FERA application by mail, with the necessary form conveniently included on the reverse side of the flyer.

In September 2026, SCE received 120 enrollments via leveraging (intra-utility) activities, and 1,969 enrollments via customer self-enrollment (online, paper, and phone).

---

[27] *See* Pub. Util. Code § 739.12. SCE previously stated that this requirement applied to households with three or more members; however, in September 2024, the household size requirement was removed from the relevant California statute via Senate Bill 1130.

3.1.1. Please provide FERA Program summary costs.

The following table provides the FERA budget and expenses, by category.

FERA Table 3.1.1.1 FERA Program Summary Costs for 2026			
FERA Budget Categories	**Authorized Budget**	**Actual Expenses Year-to-Date**	**% of Budget Spent**
Outreach[28]	$963,040	$626,049	65%
Processing / Certification and Re-certification	$426,572	$87,280	20%
Post Enrollment Verification	$134,707	$15,727	12%
Information/Tech Programming	$30,000	$402	1%
Pilots	$ -	$-	0%
Studies	$54,000	$-	0%
Regulatory Compliance	$16,392	$-	0%
General Administration	$48,452	$101,257	209%
CPUC ED Staff	$4,375	$-	0%
Total Expenses	**$1,677,538**	**$830,714**	**50%**
Subsidies and Benefits	$57,127,419	$15,547,026	27%
Total Program Costs & Discounts	**$58,804,957**	**$16,377,741**	**28%**

For a detailed breakdown of FERA expenditures, see FERA Table 1 in Appendix A.

[28] Marketing expenses are generally invoiced in arrears. As a result, certain outreach activity may be reflected in subsequent reporting periods.

3.1.2 Provide the FERA Program enrollment rate to date.

FERA Table 3.1.2.1 FERA Enrollment		
Participants Enrolled	**Eligible Participants[29]**	**Enrollment Rate**
55,651	357,896	16%

For a detailed breakdown of SCE's FERA metrics, see the following Tables in Appendix A:

- **FERA Table 2 – Enrollment Overview**
- **FERA Table 3A – Post-Enrollment Verification**
- **FERA Table 3B – High-Use Verification**
- **FERA Table 4 – Enrollment by County**
- **FERA Table 5 – Recertification**

3.2 FERA Marketing & Outreach

3.2.1 Discuss utility outreach activities and those undertaken by third parties on the utility's behalf.

SCE's FERA outreach aligns closely with CARE initiatives, involving internal partners such as SCE's Consumer Affairs and Corporate Communications, and external agencies like FBOs and CBOs. Through data-driven funnel analysis, SCE continues to strive to achieve a 70% FERA penetration goal. Despite expansive efforts, SCE continues to face challenges in increasing FERA enrollments, achieving a 15% penetration rate to date. To improve enrollment numbers, SCE continues to explore other avenues by

[29] On April 8, 2026, PG&E, on behalf of the IOUs, filed the Annual Estimates of CARE and FERA Eligible Customers and Related Information. This number reflects estimates of SCE's FERA Eligible Participants for 2026.

engaging with state agencies and implementing more targeted campaigns for hard-to-reach customers.

Given current FERA enrollment and results, the current targets are too high. SCE has recommended adjusting these targets in the next application cycle.

SCE continues to support FERA enrollment through a targeted, multichannel marketing approach designed to increase awareness and encourage high -propensity customers to apply for FERA. In September, SCE continued to leverage propensity modeling to support customer targeting and the data-driven outreach strategy. The propensity model continues to identify customers with a higher likelihood to enroll in FERA and informs how outreach is sequenced. Within direct marketing tactics SCE leveraged the existing propensity model to refine campaign execution through a targeted approach designed to engage customers who are more likely to enroll.

Through September, SCE's integrated multi-channel media plan continued strategic outreach to maintain engagement across key customer touchpoints. The current multi-channel media strategy includes paid social, paid search, programmatic display, Google Performance Max (PMAX) and digital audio. SCE continues to regularly monitor channel performance and adjusts as appropriate to support engagement and program objectives.

To provide accessibility, campaign creative includes Spanish-language versions across multiple channels. This approach is consistent with SCE's broader efforts to provide accessible outreach to diverse customers.

The current FERA multi-channel media strategy plan has included geographic targeting to focus outreach in areas with higher eligibility potential. This includes prioritizing high-eligibility ZIP codes where customers may be more likely to qualify for FERA based on eligibility zip codes (ACS Study data). This targeted outreach approach brings program awareness to areas with higher eligibility potential.

Direct Marketing

Email and Direct Mail

SCE continued to refine the direct marketing approach through targeted outreach enhancements designed to improve customer engagement and program awareness and consideration. The communication leveraged customer insights and propensity-based targeting to better prioritize customer communications and increase message relevance. The "Awareness" email communication is aligned with key customer billing cycles designed to support the savings message during moments where affordability and savings are top of mind. These refinements were implemented to enhance customer engagement and encourage FERA enrollment among customers with higher likelihood to enroll in FERA.

In September, approximately 100,672 customers were targeted with the "Awareness" email communication. As a second touch for those customers who didn't engage with the "Awareness" communication, the "Consideration" email was deployed to approximately 69,456 customers. Direct mail communications were sent to customers without a deliverable email address.

Community Outreach & Engagement

See Section 2.2.1 for joint Community Outreach and Engagement with CARE.

Tribal Outreach

See Section 1.2.1, Tribal Outreach.

FERA Partners (Capitation Agencies)

SCE has only one FERA-only	
ESA Leads	N/A
FERA Enrollments	0
FERA Recertifications	N/A

For a detailed breakdown of FERA Capitation Agency expenditures, see FERA Table 6 in Appendix A.

3.3 FERA Recertification Complaints

3.3.1 Report the number of customer complaints received (formal or informal, however, and wherever received) about their FERA recertification efforts, with the nature of the complaints and resolution.

Similar to CARE, FERA recertification complaints are reported to SCE's Consumer Affairs Department (CAB). These recertification-related complaints commonly involve issues such as recertification removals, processing delays, and program eligibility questions. Informal complaints originate with the Consumers CAB of the Commission[30] and are referred to SCE's Consumer Affairs Department for resolution. In September 2026, the CARE/FERA support team received zero informal complaints through SCE's Consumer Affairs team related to the FERA recertification process.

SCE also tracks formal complaints initiated with the Commission. During September 2026, there were zero formal complaints related to FERA recertification.

3.4 FERA Studies and Pilots

3.4.1 FERA Program Studies

ESA/CARE/FERA Eligibility Study

Refer to ESA Section 1.5.1 for ESA/CARE/FERA Eligibility Study.

3.4.2 FERA Program Pilot

There are no active Pilot Programs for the FERA program.

---

30 The IOUs have interpreted this section to call for the disclosures of information that goes through the CAB. SCE, going forward, will also include any formal complaints filed with the CPUC on the FERA recertification. SCE has not been reporting recertification issues that arise through SCE internal channels whether these area inquiries, complaints, questions, and other types of requests. Should the Commission determine that additional information is required to be reported under this section, SCE will promptly comply.

ESA Pilot Plus and Pilot Deep (ESA Whole Home)[7]	$ 4,249,515		$ 4,249,515	$ 221,675		$ 221,675	$ 3,819,180		$ 3,819,180	90%	0%	90%
Building Electrification Retrofit Pilot[4]	$ 23,465,335		$ 23,465,335	$ 1,526,011		$ 1,526,011	$ 16,409,065		$ 16,409,065	70%	0%	70%
Clean Energy Homes New Construction Pilot[3][8]	$ 4,804		$ 4,804	$ -		$ -	$ 4,828		$ 4,828	100%	0%	100%
Single Point of Contact (SPOC)	$ 171,929		$ 171,929	$ 14,267		$ 14,267	$ 111,294		$ 111,294	65%	0%	65%
ESA Program TOTAL	**$ 135,251,053**		**$ 135,251,053**	**$ 8,189,140**		**$ 8,189,140**	**$ 96,768,402**		**$ 96,768,402**	**72%**	**0%**	**72%**

[1] Budget authorized in D.21-06-015, Attachment 1.

[2] Does not include MFWB Co-Funding Agreement payments to SDG&E (lead utility). Costs illustrates expenses only.

[3] Reflects the revised budget approved in AL 4664-E, December 15, 2021.

[4] The BE Pilot budget reflects remaining funds from the authorized $40.8M program-cycle budget. Pursuant to D. 21-06-015, OP 181, the BE Pilot is exempt from standard fund-shifting limitations.

[5] Includes fund shift of $33.9M authorized in AL 5852-E, effective 8-9-2026. Per AL 5852-E funds shifted will "...support program delivery activities and inspections, such as customer enrollments, measure installations and inspections. The shifted funds will not be allocated to general program management expenses." Includes fund shift of $33.9M authorized in AL 5852-E, effective 8-9-2026. Per AL 5852-E funds shifted will "...support program delivery activities and inspections, such as customer enrollments, measure installations and inspections. The shifted funds will not be allocated to general program management expenses."

[6] Reflects the 2026 MFWB authorized budget of $12,334,249 and remaining 2025 carryforward of $10,768,830, net of the $15,691,244 fund shift authorized in AL 5852-E.

[7] Reflects the 2026 Pilot Plus and Pilot Deep authorized budget of $3,884,864 and remaining 2025 carryforward of $364,651, net of the $10,928,914 fund shift authorized in AL 5852-E.

[8] Reflects the Clean Energy Homes Pilot 2026 authorized budget of $1,723,000 and 2025 carryforward of $5,583,594. Following the pilot's sunset at the end of 2025, $7,301,790 was fund shifted pursuant to AL 5852-E.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

% of Administrative Spend									6%			

[1] Budget authorized in D.21-06-015, Attachment 1.

[2] D.21-06-015, OP 112 - "Pacific Gas and Electric Company, Southern California Edison Company, Southern California Gas Company and San Diego Gas & Electric Company's Energy Savings Assistance (ESA) program administrative expenses are capped at either 10 percent of total program costs, or the Utility's historical five-year average spend on administrative costs as a percentage of total program costs, whichever is greater. The use of the historical five-year average spend will be phased out such that the Utilities must propose to spend no more than 10 percent of total program costs on administrative costs starting in program year 2024. The definition and categorization of administrative cost for the ESA program will be consistent with that of the main energy efficiency program."

[3] Administrative Expenses adjusted to be consistent with the Energy Efficiency program administrative costs categories.

[4] Includes fund shift of $33.9M authorized in AL 5852-E, effective 8-9-2026. Per AL 5852-E funds shifted will "...support program delivery activities and inspections, such as customer enrollments, measure installations and inspections. The shifted funds will not be allocated to general program management expenses."

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

Energy Savings Assistance Program Table 2 - Main (SF, MH) Summary
Southern California Edison
Through September 2026

			ESA Main Program (Summary) Total

ESA In-Home Energy Education			Home	47,322	-	-	-	$ 1,464,466	2%
Total Savings/Expenditures					**21,282,459**	**3,283**	**(58,137)**	**$ 60,132,292**	**100%**
Total Households Weatherized [5]				81					

Households Treated			**Total**	
- Single Family Households Treated			Home	40,604
- Mobile Homes Treated			Home	4,535
Total Number of Households Treated			Home	**45,139**
# Eligible Households to be Treated for PY[6]			Home	**56,806**
% of Households Treated			%	79%
- Master-Meter Households Treated			Home	1,891

	Year to Date Expenses		
ESA Program - Main	**Electric**	**Gas**	**Total**
Administration	$ 8,886,110		$ 8,886,110
Direct Implementation (Non-Incentive)	$ -		$ -
Direct Implementation	$ 60,132,292		$ 60,132,292 *<<Includes measures costs*
TOTAL ESA Main COSTS	$ 69,018,402	$ -	$ 69,018,402

[1] Savings are based on DNV/GL Impact Evaluation Program Years 2015-2017 for measures studied by that evaluation. Savings for all other measures are based on SCE or Statewide Work Papers.
[2] Other Domestic Hot Water includes Faucet Aerators and Low Flow Showerheads.
[3] Envelope and Air Sealing Measures may include outlet cover plate gaskets, attic access weatherization, weatherstripping - door, caulking and minor home repairs. Minor home repairs predominantly are door jamb repair / replacement, door repair, and window putty.
[4] SCE performs Duct Test and Seal only as required by Title 24 as part of HVAC replacements. Costs and savings are embedded in the HVAC costs and savings.
[5] Weatherization may consist of attic insulation, attic access weatherization, weatherstripping - door, caulking, and minor home repairs.
[6] Based on authorized 2026 Program Year budget approved in CPUC Decision 21-06-015 (June 13, 2021).
[7] These measures meet the current definition of Health, Comfort, and Safety (HCS) measures, which are characterized by estimated energy savings of less than 1 therm or 1 kWh.

NOTE: Any measures noted as 'New' have been added during the course of this program year.
NOTE: Any measures noted as 'Removed', are no longer offered by the program but have been kept for tracking purposes.
NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

TOTAL MFWB COSTS	$ 7,516,926	$ -	$ 7,516,926	

[1] Measures are customized by each IOU, see 'Table 2B-1, Eligible Measures List'. Measures list may change based on available information on both costs and benefits and may vary across climate zones. Each IOU should fill out Table 2B as it pertains to their program. Table 2B-1 Column A should match Table 2B Column A for eligible (not canceled) measures. PG&E inadvertently misreported the number of DHW, Furnace, and Window installations in August that the quantities were reported in system output (kBtu) for DHW and Furnace, and in sqft sizes for Windows. These totals have been corrected in this month's report.
Highlighted in red are the in-unit measure types that were not included in the previous version of the table.

[2] Multifamily properties are sites with at least five (5) or more dwelling units. The properties may have multiple buildings.

[3] Multifamily tenant units are the number of dwelling units located within properties treated. This number does not represent the same number of dwellings treated as captured in table 2A.
[4] Commissioning costs, as allowable per the Decision, are included in measures total cost unless otherwise noted.
[5] Applicable to Deed-Restricted, government and non-profit owned multi-family buildings described in D.16-11-022, modified by D.17-12-009, where 65% of tenants are income eligible based (at or below 200% of the Federal Poverty Guidelines).
[6] Total MFWB YTD expenses are reported in ESA Table 2A.
[7] Measure type column added to identify if a measure is for in-unit or common area/whole building because they use different workpaper savings.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.
NOTE: Audit costs may be covered by other programs or projects may utilize previous audits. Not all participants will have an audit cost associated with their project.

ESA Program - Building Electrification	Year to Date Expenses			
	Electric	Gas	Total	
Administration	$ 312,165		$ 312,165	
Direct Implementation (Non-Incentive)[6]	$ 347,424		$ 347,424	
Direct Implementation[7]	$ 15,749,475		$ 15,749,475	*<<Includes measures costs*
TOTAL Building Electrification COSTS	$ 16,409,065	$ -	$ 16,409,065	

[1] The costs for the following measures are included in the overall expenditures of the BE Pilot: additional line set for ductless mini-splits, building permits, and thermostat common wire.

[2] The BE Pilot has reviewed all fuel-substitution measures and updated the data with the negative kWh value.

[3] These measures do not have any savings associated and may be required to complete the installation to electrify the residential end-uses of participating households.

[4] Claimable kWh Savings was calculated using methodology in Fuel Substitution Technical Guidance Document in accordance to D.19-08-009; Claimable kWh = kWh + (Therm *

[5] Estimated average annual bill savings is calculated prior to participation. The estimated annual bill savings is based on existing equipment in the home, electric and gas utility rates, and usage. The bill savings analysis is based on the assumption that heating, cooling and hot water usage will remain the same in the future and using a Time-Of-Use plan (e.g., TOU-D-PRIME) that best fits the home.

[6] Includes Marketing & Outreach, Processing, and Inspection costs.

[7] Direct Implementation Year to Date (YTD) Expenses will have a monthly lag of recorded expenditures and not match the expenditures in Cell G31.

Total Savings/Expenditures						

[1] CEH does not track installations since it is a Design Assistance and Tenant Education Incentive Program. CEH tracks Interest Forms (Interest in the Program).

[2] Interest Forms include a count of those customers interested in General Technical Assistance: AEA provides general education and guidance. Those participants who submit a formal application to participate in the program will do so under with direct design or a design incentive. Direct Design: AEA provides direct design assistance for all-electric builds. Design Incentive: Participant submitted an application for a design incentive. No new applications will be received in 2025 due to the ramp down of CEH. All marketing and outreach activities have ceased.

[3] The ($) amount for DI is $50K for each project. One project have incentive totals to $50k.

NOTE: Columns reflect cumulative total numbers instead of YTD total, as previously reported.

[1] Authorized per D.21-06-015. Funds for pilots and studies may be rolled over to the next program year or borrowed from a future program year within the cycle, to allow for flexibility in scheduling changes with these efforts. Funding amounts listed reflect SCE's 30% allocation among the IOUs. Final authorized budgets may be adjusted by the ESA/CARE Studies Working Group per D.21-06-015.

[2] Some studies cover multiple cycles. Hence this column total reflects the total study spending (as opposed to cycle spending).

[3] Decision D.21-06-015 approved Joint Utilities' 2025 LINA Study for $500,000. SoCalGas holds the statewide contract for this co-funded study. SCE has not been fully cross-billed so the actual amount incurred will be greater than what is reflected in this table until bills are reconciled. SCE's 30% allocation is $150,000, funded 50/50 via the ESA and CARE budgets.

[4] Authorized per D.21-06-015, the Categorical Study will be funded 50/50 via the ESA and CARE budgets.

[5] Decision D.21-06-015 approved Joint Utilities' 2022 ESA NEI Study for $500,000. SCE holds the statewide contract for this co-funded study and will cross-bill the other IOUs. The total budget and spend reflected includes SCE's allocated CFA portion only. Full

[6] Pilot Evaluation budget and expenditures are included in the overall budget and expenditures of the Pilot.

[7] This represents the full evaluation budget.

[8] Per the July 2026 ED/IOU agreement, study names and associated budget allocations were updated beginning with the July 2026 report to better reflect the scope of the evaluation efforts.
Load Impact Evaluation Study" to "ESA Main Impact & Process Evaluation" and "Joint IOU Process Evaluation Studies (1–4 Studies)" to "MFWB Impact & Process Evaluation," Total statewide authorized funding remains unchanged. Updated the budget allocation by splitting the statewide budget evenly between the two studies to better reflect the expected funding associated with each effort.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

Energy Savings Assistance Program Table 7 - Customer Segments/Needs State by Demographic, Financial, Location, and Health Conditions
Southern California Edison
Through September 2026

Customer Segments:

NOTES:

[1] Athens eligibility estimates at 250 FPL applied to customer segment population.

[2] Households Treated data is not additive because customers may be represented in multiple categories.

[3] Includes only households that SCE contacted by direct mail or email campaigns in CY2023. Customers could also have been contacted multiple times within a year. They could also be contacted by other means, such as by contractors or another utility, which is not reflected in this value. SCE only tracks its direct mail and email campaign efforts.

Hard to Reach

[4] "Hard to Reach" is defined as a customer who meets at least one of the following characteristics: Prefers non-English language, is low income, lives in a mobile home or multifamily dwelling unit, is a renter/tenant, or is Rural.

Vulnerable

[5] Vulnerable is defined as Disadvantaged Vulnerable Communities (DVC) which consists of communities in the 25% highest scoring census tracts according to the most current versions of the CalEnviroScreen, as well as all California tribal lands, census tracts that score in the highest 5% of Pollution Burden within CalEnviroScreen, but do not receive an overall CalEnviroScreen score due to unreliable public health and socioeconomic data, and census tracts with median household incomes less than 60% of state median income.

CARB Communities

[6] Utilized AB617 Communities identified by CARB's Community Air Protection Program (CAPP).

Disconnected

[7] Based on calendar year 2025

High Energy Burden

[8] Utilizing Low-Income Energy Affordability Data (LEAD) Tool to determine average energy burden as a % of income by census tract. High Energy Burden threshold of 6.3% and above is selected based on 2016 Low Income Needs Assessment (LINA).

SEVI

[9] The Socioeconomic Vulnerability Index (SEVI) metric represents the relative socioeconomic standing of census tracts, referred to as communities, in terms of poverty, unemployment, educational attainment, linguistic isolation, and percentage of income spent on housing.

Affordability Ratio

[10] Utilizing AR20 data, census tracts with Electric AR20 above 15% is selected. Threshold based on CPUC 2019 Annual Affordability Report.

Respiratory

[11] Based on Asthma score in CalEnviroScreen 5.0.

Arrearages

[12] Estimated eligibility is based on CARE/FERA households with arrearages reported in the December 2025 Monthly Disconnection Report.

NOTES:

[1] Households Treated data is not additive because customers may be represented in multiple categories.

[2] "Hard to Reach" is defined as a customer who meets at least one of the following characteristics: Prefers non-English language, is low income, lives in a mobile home or multifamily dwelling unit, is a renter/tenant, or is Rural.

[3] Vulnerable is defined as Disadvantaged Vulnerable Communities (DVC) which consists of communities in the 25% highest scoring census tracts according to the most current versions of the CalEnviroScreen, as well as all California tribal lands, census tracts that score in the highest 5% of Pollution Burden within CalEnviroScreen, but do not receive an overall CalEnviroScreen score due to unreliable public health and socioeconomic data, and census tracts with median household incomes less than 60% of state median income.

[4] Utilized AB617 Communities identified by CARB's Community Air Protection Program (CAPP).

[5] Utilizing Low-Income Energy Affordability Data (LEAD) Tool to determine average energy burden as a % of income by census tract. HEB threshold of 6.3% and above is selected based on 2016 Low Income Needs Assessment (LINA).

[6] The Socioeconomic Vulnerability Index (SEVI) metric represents the relative socioeconomic standing of census tracts, referred to as communities, in terms of poverty, unemployment, educational attainment, linguistic isolation, and percentage of income spent on housing.

[7] Utilizing AR20 data, census tracts with Electric AR20 above 15% is selected. Threshold based on CPUC 2019 Annual Affordability Report.

[8] Based on Asthma score in CalEnviroScreen 5.0.

Energy Savings Assistance Program Table 8 - Clean Energy Referral, Leveraging, and Coordination
Southern California Edison
Through September 2026

		Outbound	Collaboration		Inbound	
Partner	**Brief Description of Effort**	**# of Referral [1]**	**# of Leveraging [2]**	**# of Coordination Efforts [3]**	**# of Leads [4]**	**# of Enrollments [5]**
Single-Family Affordable Solar Homes (SASH)[9] [10]	Provides qualified low-income homeowners fixed, up front, capacity-based incentives to help offset the upfront cost of a solar electric system.	68	N/A	N/A	193	20
Multifamily Affordable Solar Housing (MASH)	Provides solar incentives on qualifying affordable housing multifamily dwellings. MASH is the low-income, multifamily component within the California Solar Initiative program.	N/A	1	N/A	25	0
Medical Baseline (MBL) [11]	Provides eligible enrolled customers with an additional 16.5 kilowatt-hours (kWh) of electricity per day. Provided at the lowest baseline rate, this program helps offset the cost of operating the necessary medical equipment.	N/A	N/A	141	4,629	2,341
CARE/FERA Income Verification	Number of ESA Main enrollments with their income having been verified by ESA program that had the rate CARE/FERA identified and show no indication of previous PEV.	N/A	N/A	1,149	N/A	N/A
CARE High Usage	Customers whose usage was identified as exceeding 400% to 600% (or more) above the baseline.	N/A	N/A	N/A	0	187
Cool Center Informational Exchange	SCE provides information to respective counties' cool centers within the SCE service territory about all of the low-income programs and services that are available.	N/A	N/A	6	N/A	N/A
Demand Response - Summer Discount Plan (SDP) [7]	Residential and non-residential customers participate by allowing SCE to shut down their A/C for up to 6 hours a day during “Energy Events” called during periods of high electricity demand, or emergencies. SCE will supply and install a load control device on your home or central-A/C unit to remotely shut it off during energy events.	83	N/A	9	N/A	N/A
Demand Response - Smart Energy Program (SEP) [7]	Eligible residential customers who own a qualifying Wi-Fi enabled smart thermostat may enroll. During an "energy event", SCE will notify the smart thermostat provider to temporarily adjust the temperature setting on the thermostat up to four degrees to limit A/C usage. Participating customers may qualify for a one-time $75 incentive for enrolling and earn up to $40 annually for participating between June 1 through September 30.	129	N/A	14	N/A	N/A
Tribal Activity	SCE collaborated with Tribal leaders, offering $13K mini grants aimed at providing training on SCE’s income-qualified programs. The objective was to empower Tribal leaders to act as intermediaries within their communities, disseminating information about these programs to increase Tribal enrollments and installations. In addition, the SCE Tribal team engages daily with 13 federally recognized tribes to promote SCE products and services.	N/A	N/A	45	0	N/A
Other Utilities [6]	Southwest Gas	1,160	N/A	N/A	1,424	24
Other Utilities [6]	SoCalGas	N/A	N/A	N/A	1,890	1,865
Other Utilities [6]	PG&E	N/A	N/A	N/A	N/A	N/A
MFWB [8]	Coordination with RHA (SDG&E's Implementer) for the Southern MFWB program	2,967	N/A	0	N/A	N/A
ESA Whole Home to ESA Main	Number of Homes Enrolled in ESA Core as a result of being referred by ESA Whole Home due to home not being able to meet minimum 5% for ESA Whole Home participation.	N/A	N/A	N/A	229	7

[1] Number of outbound referrals being given to the Partner.
[2] Number of activities that involve the sharing of resources to jointly support program delivery or administration. (Example: Sharing of Lead Lists, Cost Splitting, etc.).
[3] Number of unique activities related to program communication (marketing), collaboration of events, and alignment of activities (outreach events, tradeshows, etc.) to support program awareness and delivery. Unique marketing activities are different types of activities, not the total sum of the correspondences. Events are unique event counts, not the total sum of event days.
[4] Number of inbound Leads or Referrals from the Partner.
[5] Number of enrollments that results from the Leads or Referrals supplied by the Partner.
[6] Utility Territorial Overlap; Referrals being exchanged between the utilities.
[7] YTD number of customers that enrolled in the program within 120-days of their ESA in-home visitation in which they received Energy Education.
[8] Number of referrals being supplied to SDG&E by SCE and the number of Enrollments being completed on behalf of SCE by MFWB.
[9] D.16-11-022, OP 84: "Starting January 1, 2017, Pacific Gas and Electric Company, Southern California Edison Company, and San Diego Gas & Electric Company shall provide the Singlefamily Affordable Solar Homes Program Administrator, current GRID Alternatives, with a monthly list of owner occupied singlefamily households that have completed the Energy Savings Assistance (ESA) Program requirements of the California Alternate Rates for Energy (CARE) Program high usage process."
[10] Enrollments previously calculated as leads successfully imported to ESA systems. Updated to reflect current calculation based on number of imported and enrolled customers.
[11] Number of Leads may be less than previously reported depending on the customers account status at the time the data is provided
NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

Energy Savings Assistance Program Table - 9 Tribal Outreach
Southern California Edison
Through September 2026

OUTREACH STATUS	Quantity (Includes CARE, FERA, and ESA)	List of Participating Tribes
Tribes completed ESA Meet & Confer	1	Bishop Paiute
Tribes requested outreach materials or applications	8	Morongo, Chemehuevi, Soboba, Tule River, Bridgeport, Benton, Agua Caliente, Benton Pauite
Tribes who have not accepted offer to Meet and Confer	0	
Non-Federally Recognized Tribes who participated in Meet & Confer	0	
Tribes and Housing Authority sites involved in Focused Project/ESA	0	
Partnership offer on Tribal Lands	0	
Housing Authority and Tribal Temporary Assistance for Needy Families (TANF) office who received outreach (this includes email, U.S. mail, and/or phone calls)	3	Morongo, Soboba, Tule River
Housing Authority and TANF offices who participated in Meet and Confer	0

[1] The amount of repayments expected to be collected each month, calculated by dividing the total Advance Payment into 28 monthly installments. The first repayment is due on September 3, 2024, with subsequent repayments due on the first business day of each month. The Prime Contractor must repay the full Advance Payment by December 1, 2026.

[2] Prime Contractor may fulfill its Repayment Obligation by invoice reduction, allowing SCE to withhold payments due for an outstanding invoice. SCE will credit the Repayment Obligation amount to reduce the unpaid balance of the Advance Payment and pay the remaining invoice amount to Prime Contractor.

[3] Prime Contractor may fulfill its Repayment Obligation through electronic payments, such as via Automated Clearing House (ACH) or wire.

[4] SCE will track payments, outstanding balances, and the remaining balance of the Advanced Payment on a monthly basis.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

[1] Enrollments via data sharing between the IOUs.

[2] Enrollments via data sharing between departments and/or programs within the utility.

[3] Enrollments via data sharing with programs outside the IOU that serve low-income customers.

[4] No response includes no response to both Recertification and Verification.

[5] Includes customers who requested to be removed, deceased, and customers who moved out.

[6] Based on the Annual Estimates of CARE and FERA Eligible Customers and Related Information filed on April 8, 2026.

[7] SCE also identified potential data discrepancy associated with CARE and FERA recertification extraction scripts used for reporting. SCE is actively validating the affected data, assessing impacts to previously reported figures, and will provide updates to Energy Division if corrections to historical reporting are warranted.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

[1] Includes customers verified as over income or who requested to be de-enrolled.
[2] Verification results are tied to the month initiated. The process allows customers 90 days to respond to the verification request. Results may be pending due to the time permitted for a participant to respond.
[3] D.19-07-015 established a permanent set of emergency disaster customer protection measures that the utilities are mandated to implement in the event of a declared emergency. In response to the mandated customer protections, SCE has implemented a CARE post-enrollment verification (PEV) freeze to low-income customers impacted by the California emergencies / events for a period of one year commencing from the date the Governor of California issued an emergency proclamation due to a disaster. Applicable to April 2023 reporting and beyond. Number of requests updated to exclude customers exempted due to emergency disaster protections.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

[1] Excludes count of customers recertified through the probability model.

[2] Recertification results are tied to the month initiated and the recertification process allows customers 90 days to respond to the recertification request. Results may be pending due to the time permitted for a participant to respond.

[3] Includes customers who did not respond or who requested to be de-enrolled. Does not include customers who were deenrolled due to other reasons such as moved out, no response/failed verification, deceased, and etc.

[4] Percentage of customers recertified compared to the total participants requested to recertify in that month.

[5] D.19-07-015 established a permanent set of emergency disaster customer protection measures that the utilities are mandated to implement in the event of a declared emergency. In response to the mandated customer protections, SCE has implemented a CARE post-enrollment verification (PEV) freeze to low-income customers impacted by the California emergencies / events for a period of one year

Note: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

[1] Authorized per D.21-06-015. Funds for pilots and studies may be rolled over to the next program year or borrowed from a future program year within the cycle, to allow for flexibility in scheduling changes with these efforts. Funding amounts listed reflect SCE's 30% allocation among the IOUs. Final authorized budgets may be adjusted by the ESA/CARE Studies Working Group per D.21-06-015.

[2] Some studies cover multiple cycles. Hence this column total reflects the total study spending (as opposed to cycle spending).

[3] Decision D.21-06-015 approved Joint Utilities' 2025 LINA Study for $500,000. SoCalGas holds the statewide contract for this co-funded study. SCE has not been fully cross-billed so the actual amount incurred will be greater than what is reflected in this table until bills are reconciled. SCE's 30% allocation is $150,000, funded 50/50 via the ESA and CARE budgets.

[4] Authorized per D.21-06-015, the Categorical Study will be funded 50/50 via the ESA and CARE budgets.

[5] CHANGES Evaluation funding is not part of EM&V budget, but funded out of CARE budget as part of the CHANGES program. Two evaluations were conducted during this cycle. The total statewide budget for both studies is $420,600 The first of the two was completed in 2023 and cost a total of $245,011. The budget for the second evaluation is $175,500. SCE paid 30% of the study costs.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

CARE Program Table 8 - CARE and Disadvantaged Communities Enrollment Rate for Zip
Southern California Edison
Through September 2026

Total CARE Households Enrolled

Month	CARE Enrollment Rate for Zip Codes that have 10% or more disconnections [1]	CARE Enrollment Rate for Zip Codes in High Poverty (Income Less than 100% FPG) [2]	CARE Enrollment Rate for Zip Codes in High Poverty (with 70% or Less CARE Penetration)	CARE Enrollment Rate for DAC (Zip/Census Tract) Codes in High Poverty (with 70% or Less CARE Enrollment Rate) [3]

[1] Excludes count of customers recertified through the probability model.

[2] Recertification results are tied to the month initiated and the recertification process allows customers 90 days to respond to the recertification request. Results may be pending due to the time permitted for a participant to respond.

[3] Includes customers who did not respond or who requested to be de-enrolled. Does not include customers who were deenrolled due to other reasons such as moved out, no response/failed verification, deceased, and etc.

[4] Percentage of customers recertified compared to the total participants requested to recertify in that month.

D.19-07-015 established a permanent set of emergency disaster customer protection measures that the utilities are mandated to implement in the event of a declared emergency. In response to the mandated customer protections, SCE has implemented a CARE post-enrollment verification (PEV) freeze to low-income customers impacted by the California emergencies / events for a period of one year commencing from the date the Governor of California issued an emergency proclamation due to a disaster.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.
